# AIEE INDEXES

This pamphlet contains complete multientry indexes covering the entire text content of AIEE regular technical publications, as follows:

1. **Electrical Engineering,** monthly, sent to all members. Contains two parts:

   I. General articles, news, and biographical items.
   II. Transactions section, containing technical-program papers.

2. **Supplement to Electrical Engineering—Transactions Section.** Issued in limited quantities at mid-year (June Supplement) and year-end (December Supplement). Contains the technical program papers that could not be accommodated in the monthly Transactions sections of *Electrical Engineering*, plus discussions of all technical-program papers published during the preceding half year. Price 50 cents per copy.

3. **AIEE Transactions.** Published annually. Contains all approved technical-program papers and related discussions for the calendar year. Consists of Transactions sections from the monthly issues of *Electrical Engineering;* the two semiannual Supplements (as described in item 2 above); and certain other material considered to be of permanent record value. Price $4.00 per copy to AIEE members; $12.00 plus foreign postage to nonmembers.

## I. GENERAL MATERIAL
### (Pages 3–11)

General articles, news, and biographical items published in the general monthly periodical are indexed as follows:

1. **Subject Index.** Lists all general-interest articles by subjects.

2. **Author Index.** Lists authors of all general-interest articles and "Letters to the Editor."

3. **AIEE News Index.** Lists all news items pertaining to Institute Activities.

4. **Non-AIEE News Index.** Lists all news items "Of Current Interest" not pertaining directly to Institute activities.

5. **Biographical Index.** Lists all personal and obituary items on AIEE members.

**Page Allocation by Issues**

| | | | |
|---|---|---|---|
| January | 1–46 | July | 239–282 |
| February | 47–86 | August | 283–314 |
| March | 87–132 | September | 315–350 |
| April | 133–172 | October | 351–382 |
| May | 173–206 | November | 383–422 |
| June | 207–238 | December | 423–470 |

## II. TRANSACTIONS MATERIAL
### (Pages 12–23)

Technical-program papers and related discussions are indexed as follows:

1. **Technical-Subject Index.** Lists all technical-program papers and related discussions by subjects.

2. **Author Index.** Lists authors of all technical-program papers and discussions.

Of the total content of the 1945 annual *Transactions*, pages 1–358 and 495–872 inclusive were published in the Transactions sections of *Electrical Engineering* during 1945 as tabulated below; pages 359–494 were published in the June "Supplement to Electrical Engineering—Transactions Section" and pages 873–1000 in the December Supplement.

**Page Allocation by Issues**

| | | | |
|---|---|---|---|
| January | 1–40 | July | 495–550 |
| February | 41–86 | August | 551–606 |
| March | 87–150 | September | 607–670 |
| April | 151–214 | October | 671–734 |
| May | 215–278 | November | 735–806 |
| June | 279–358 | December | 807–872 |
| June Supplement | 359–494 | December Supplement | 873–1000 |

# I—GENERAL MATERIAL

(See page 12 for Transactions Material Index)

## 1. Subject Index

Airfield, Fog Dispersal at British. (Filler) . . . . . 362
Alexanderson, E. F. W.—1944 Edison Medalist . . 138–40
A-C Network Calculator, Dual. Parker . . . . . 182–3
Altitude on Electric Apparatus, Effect of. Robertson . . . . . 214–16
AIEE Report on Collective Bargaining . . . . . 239–45
Letter . . . . . 380
(AIEE) Standards for Steam Turbine Generators . . 180
(ASME) Standards for Steam Turbine Generators . . 180
Analysis of Electromagnetic Forces, An. Tripp . . 351–6
Anniversary of Radiobroadcasting, 25th . . . . . 365–6
Antenna Radiation Patterns, Calculating. (Letters)
Kraus . . . . . 131, 204
Crossley . . . . . 131
Apparatus, Effect of Altitude on Electric. Robertson . . . . . 214–16
Application of Electronics in the Electric Power Industry. Wagner . . . . . 323–7
Applications of Thevenin's Theorem. Richter . 103–05
Letters . . . . . 204, 381
Army Ground Communication Equipment. Colton . . . . . 173–9
Aviation and the Electrical Engineer. Holliday . 58–60
Aviation Communication Systems. Rentzel . . . 387–91

B

Bactericidal Lamps. (Letter) Contier . . . . . 349
Band Program-Transmission Circuits, Wide-. Baker . . . . . 99–103
Bargaining, AIEE Report on Collective . . . . . 239–45
Letter . . . . . 380
Beginnings of Nuclear Physics. Darrow . . . . . 315–18
Board of Directors, Report of the . . . . . 254–69
Breaker Application, State of the Art of Circuit-. (Letter) Tripp . . . . . 281
British Airfield, Fog Dispersal at. (Filler) . . . . . 362
British Underground Factory, Lighting a. (Filler) . . 155
Budd Field, Lighting of. Kilpatrick, Blugerman . 17–21

C

Calculator, Dual S-C Network. Parker . . . . . 182–3
(Calculator) Robot Solves Equations. (Filler) . . . . 386
Calendar, Edwards Perpetual. (Letters)
Achelis . . . . . 281
Edwards . . . . . 281
Canons of Ethics for Engineers, Proposed. (Letter) Samuels . . . . . 170
Circuit-Breaker Application, State of the Art of. (Letter) Tripp . . . . . 281
Circuits, Wide-Band Program-Transmission. Baker . . . . . 99–103
Civic Responsibilities of Engineers . . . . . 251–2
Letter . . . . . 380
Civil Service) Engineers and Scientists in Government Service. Bennett . . . . . 383–6
Collective Bargaining, AIEE Report on . . . . . 239–45
Letter . . . . . 380
Colleges, A Reply From Industry to the. Boring, Stevenson, McEachron . . . . . 398–400
(Committee Report) AIEE Report on Collective Bargaining . . . . . 239–45
Letter . . . . . 380
(Committee Report) Civic Responsibilities of Engineers . . . . . 251–2
Letter . . . . . 380
(Committee Report) Standards for Steam Turbine Generators . . . . . 180
(Committee Reports) Statistical Methods in Quality Control:
Part I—Variability of Quality-Frequency Distributions . . . . . 181–2
Part II—Two Kinds of Measurement-Variables and Attributes . . . . . 249–50
Part III—Frequency Distribution for Setup Check of Process . . . . . 299
Part IV—Subgrouping of Data—Finding Causes of Trouble . . . . . 328–9
Part V—Variations to Be Expected in Sampling . . . . . 363–4
Part VI—Charts for Go-and-No-Go Inspection . . . . . 401–02
Part VII—Control Charts for Analysis of Variables . . . . . 448–50
Communication Equipment, Army Ground. Colton . . . . . 173–9
Communication Systems, Aviation. Rentzel . . 387–91
Communications in Italy. (Filler) . . . . . 366
Conductor, Name Suggested for Insulated. (Letter) Waring . . . . . 381
Conductors and Nonconductors, High-Frequency Heating of. Baker, Madsen . . . . . 50–7
Control of Furnace Temperatures, Electronic. (Filler) . . . . . 289
Control, Silent Electric Signaling and. (Filler) . . . . 329
Control, Statistical Methods in Quality. (Committee Reports):
Part I—Variability of Quality-Frequency Distributions . . . . . 181–2
Part II—Two Kinds of Measurement-Variables and Attributes . . . . . 249–50
Part III—Frequency Distribution for Setup Check of Process . . . . . 299
Part IV—Subgrouping of Data—Finding Causes of Trouble . . . . . 328–9
Part V—Variations to Be Expected in Sampling . . . . . 363–4
Part VI—Charts for Go-and-No-Go Inspection . . . . . 401–02
Part VII—Control Charts for Analysis of Variables . . . . . 448–50
Controlled Rectification With Inductive and Generative Loads, Voltage and Current Relations for. (Letter) Gerstmann . . . . . 468
Co-operative Councils, A Survey of. Sanford . . . 296–8
Co-ordination, Rectifiers and Inductive. McDonald . . . . . 60–4
Councils, A Survey of Co-operative. Sanford . . . 296–8
Curriculums in Electrical Engineering, Postwar. (Letter) Noy . . . . . 86

D

Degree, The Engineering. (Letters)
Dawes . . . . . 170
Comstock . . . . . 237
Hurd . . . . . 348
Delta Mesh by Measurements Taken at the Junctions, Determination of the Individual Resistances of a. (Letter) Purnell . . . . . 348
Development, Recent Electron-Tube. Ingram . . . 22–4
Development, X-Ray History and. Coolidge, Charlton . . . . . 427–32
Developments, Industrial X-Ray. Moriarty . . . . 433–5
Developments, Influence of Research on Engineering. (Letter) Weller . . . . . 86
Diamond-Die Production, Scientific Methods in. (Letter) . . . . . 252
Dielectric Heating, A Survey of. Misers . . . . . 210–11
Doctor, Musings of an Engineer-. Berresford . . . 212–14
Drugs in Resuscitation From Electric Shock, Use of. Drinker . . . . . 288–9
Dual A-C Network Calculator. Parker . . . . . 182–3
Dust Study, Use of Electron Microscope in. (Filler) . . . . . 403

E

Edison Medalist for 1944, E. F. W. Alexanderson . . . . . 138–40
(Education) A Reply From Industry to the Colleges. Boring, Stevenson, McEachron . . . . . 398–400
Edwards Perpetual Calendar. (Letters)
Achelis . . . . . 281
Edwards . . . . . 281
Electric Apparatus, Effect of Altitude on. Robertson . . . . . 214–16
Electric Power Industry, Application of Electronics in the. Wagner . . . . . 323–7
Electric Propulsion for Ships. Coleman . . . . . 246–9
Electric Shock, Use of Drugs in Resuscitation From. Drinker . . . . . 288–9
Electric Signaling and Control, Silent. (Filler) . . . . 329
Electrical Engineer, Aviation and the. Holliday . 58–60
Electrical Engineering in the Postwar World:
Part IX—Research—Creator of Employment. Hull . . . . . 25–7
Part X—Goals in Engineering Education. Wickenden . . . . . 65–8
Part XI—Electronics—An Industry Comes of Age. Knowles . . . . . 106–08
Part XII—Developments in Radio and Television. Baker . . . . . 153–9
(Parts I through VIII published in 1944)
Electrical Engineering, Postwar Curriculums in. (Letter) Noy . . . . . 86
Electrical Engineers, Meteorology—Aid to. Mahaffy . . . . . 290–4
Electrical Essays for Recreation. Sohon . . . . 294, 364
Letters . . . . . 381
Electrical Research, One Facet of Naval. Seaman . . . . . 358–62
Electricity, Life, and Sensation. Lippit . . . . . 404–08
Electromagnetic Forces, An Analysis of. Tripp . . 351–6
Electron-Tube Development, Recent. Ingram . . . 22–4
Electronics a Global Job, Navy's. (Filler) . . . . . 91
Electronics in the Electric Power Industry, Application of. Wagner . . . . . 323–7
Electronics of the Mass Spectrometer. Hipple, Grove, Hickam . . . . . 141–5
Electronics Problems and a Proposal for a Radar Patent Pool, Some Navy. Dow . . . . . 87–91
Elevators in Service, Unorthodox Deck-Edge. (Filler) . . . . . 400
Engineer and His Future, The. Powel . . . . . 14–16
Letter . . . . . 170
Engineer, Aviation and the Electrical. Holliday . 58–60
Engineer-Doctor, Musings of an. Berresford . . . 212–14
Engineer in the Postwar Period, The. Melly . . . 356–7
Engineering Degree, The. (Letters)
Dawes . . . . . 170
Comstock . . . . . 237
Hurd . . . . . 348
Engineering Developments, Influence of Research on. (Letter) Weller . . . . . 86
Engineering, Postwar Curriculums in Electrical. (Letter) Noy . . . . . 86
Engineering Profession, Organization of the. Fairman . . . . . 220–3
Letters . . . . . 380, 382
Engineering, The Romance of. Powel . . . . . 207–10
Letter . . . . . 314
Engineers and Scientists in Government Service. Bennett . . . . . 383–6
Engineers, Civic Responsibilities of . . . . . 251–2
Letter . . . . . 380
Engineers, Meteorology—Aid to Electrical. Mahaffy . . . . . 290–4
Engineers, Proposed Canons of Ethics for. (Letter) Samuels . . . . . 170
Equipment, Army Ground Communication. Colton . . . . . 173–9
Essays for Recreation, Electrical. Sohon . . . . 294, 364
Letters . . . . . 381
Ethics for Engineers, Proposed Canons of. (Letter) Samuels . . . . . 170
Expansion, Technology in Postwar. Chevalier . . 47–50
Experiences With the X-Ray, Some. Coolidge . . 423–6
Europe, 50 Years of X-Ray Progress in . . . . . 444–8

F

Facet of Naval Electrical Research, One. Seaman . . . . . 358–62
Factory, Lighting a British Underground. (Filler) . . 155
Field, Lighting of Budd. Kilpatrick, Blugerman . 17–21
Forces, An Analysis of Electromagnetic. Tripp . . 351–6
Formula, Nomogram for Frequency. (Letter) Nachod . . . . . 469
Frequency Formula, Nomogram for. (Letter) Nachod . . . . . 469
Frequency Modulation and Television, Transmission Networks for. Osborne . . . . . 392–7
Frequency Unit, New. (Letter) Honnell . . . . . 432
Furnace Temperatures, Electronic Control of. (Filler) . . . . . 289
Future, The Engineer and His. Powel . . . . . 14–16
Letter . . . . . 170

G

Gems, X-Rays Alter Wave Length, Change Color of. (Filler) . . . . . 250
Generating Station, The Riverside. Falkon, Charles . . . . . 319–22
Generative Loads, Voltage and Current Relations for Controlled Rectification With Inductive and. (Letter) Gerstmann . . . . . 468
Generator for Power Station in Switzerland, Large. (Photo) . . . . . 208
Generators, Standards for Steam Turbine . . . . . 180

Government Service, Engineers and Scientists in. Bennett.....383-6
Ground Communication Equipment, Army. Colton.....173-9
Grounding Principles and Practice:
Part I—Fundamental Considerations on Ground Currents. Rüdenberg.....1-13
Part II—Establishing Grounds. Jensen.....68-74
Part III—Generator-Neutral Grounding Devices. Johnson.....92-9
Part IV—System Grounding. Bullard.....145-51
Part V—Static Electricity in Industry. Beach.....184-94

## H

Heat-Pump System, Experience With a. (Letter) Walton, Williams.....421
Heating, A Survey of Dielectric. Maiers.....210-11
Heating of Conductors and Nonconductors, High-Frequency. Baker, Madsen.....50-7
High-Frequency Heating of Conductors and Nonconductors. Baker, Madsen.....50-7
History and Development, X-Ray. Coolidge, Charlton.....427-32

## I

Importance of X Rays, Scientific. Garland.....437-44
Inductive and Generative Loads, Voltage and Current Relations for Controlled Rectification With. (Letter) Gerstmann.....468
Inductive Co-ordination, Rectifiers and. McDonald.....60-4
Industrial X-Ray Developments. Moriarty.....433-5
Industry, Application of Electronics in the Electric Power. Wagner.....323-7
Industry to the Colleges, A Reply From. Boring, Stevenson, McEachron.....398-400

Proposed Canons of Ethics for Engineers. Samuels.....170
Role of AIEE in Professional Relations. Hooven.....380
Status of the Art of Circuit-Breaker Application. Tripp.....381
The Engineer and His Future. Sechrist.....170
The Engineering Degree. Dawes.....170
Comstock.....237
Hurd.....348
The Romance of Engineering. Smith.....314
Value of Patents. Schramm.....380
Voltage and Current Relations for Controlled Rectification With Inductive and Generative Loads. (Letter) Gerstmann.....468
Life, and Sensation, Electricity. Lippitt.....404-08
Lighting and Safety. Logan.....217-20
Lighting of Budd Field. Kilpatrick, Bhagerman.....17-21
Loads, Voltage and Current Relations for Controlled Rectification With Inductive and Generative. (Letter) Gerstmann.....468

## M

(Manpower) Selective Service in World War II. Hale.....402-03
Mass Spectrometer, Electronics of the. Hippie, Grove, Hickam.....141-5
Measurements Taken at the Junctions, Determination of the Individual Resistances of a Delta Mesh by. (Letter) Purnell.....348
Medalist, E. F. W. Alexanderson—1944 Edison.....138-40
Mesh by Measurements Taken at the Junctions, Determination of the Individual Resistances of a Delta. (Letter) Purnell.....348
Message from the President. Powel.....16, 28
(Message) The Romance of Engineering. Powel.....207-10
Meteorology—Aid to Electrical Engineers. Mahaffy.....290-4
Methods in Quality Control, Statistical. (Committee Reports):
Part I—Variability of Quality-Frequency Distributions.....181-2
Part II—Two Kinds of Measurement-Variables and Attributes.....249-50
Part III—Frequency Distribution for Setup Check of Process.....299
Part IV—Subgrouping of Data—Finding Causes of Trouble.....328-9
Part V—Variations to Be Expected in Sampling.....363-4
Part VI—Charts for Go-and-No-Go Inspection.....401-02
Part VII—Control Charts for Analysis of Variables.....448-50
Microscope in Dust Study, Use of Electron. (Filler).....403
Miscellaneous Short Items:
Betatron Developed for Production of 100,000,000-Volt X Rays.....450
Communications in Italy.....366
Electron Microscope in Dust Study, Use of.....403
Electronic Control of Furnace Temperatures.....289
Engineer's Role in Postwar World.....295
Fog Dispersal at British Airfield.....362
High Soldering Temperatures Destroy Wire.....24
Hydroelectric Expansion in France.....357
Large Generator for Power Station in Switzerland.....298
Lighting a British Underground Factory.....155
Navy's Electronics a Global Job.....91
Repairs on Fighting Craft, Speeding.....408
Robot Solves Equations. (Photo).....386
Scientific Methods in Diamond-Die Production.....252
Silent Electric Signaling and Control.....329
Unorthodox Deck-Edge Elevators in Service.....400
X-ray Crystal Irradiation Unit. (Photo).....27
X-Ray in Industrial Inspection. (Photo).....426
X-Rays Alter Wave Length, Change Color of Gems.....250
Musings of an Engineer-Doctor. Berresford.....212-14

## N

Naval Electrical Research, One Facet of. Seaman.....358-62
Naval Vessels, Ship's Service Power Systems for. Rickover.....283-7
Navy Electronics Problems and a Proposal for a Radar Patent Pool, Some. Dow.....87-91
Network Calculator, Dual A-C. Parker.....182-3
Networks for Frequency Modulation and Television, Transmission. Osborne.....392-7
Nuclear Physics, Beginnings of. Darrow.....315-18

## O

One Facet of Naval Electrical Research. Seaman.....358-62
Organization of the Engineering Profession. Fairman.....220-3
Letters.....380, 382

## P

Patent Pool, Some Navy Electronics Problems and a Proposal for a Radar. Dow.....87-91
Patents, Value of. (Letter) Schramm.....380
Patterns, Calculating Antenna Radiation. (Letters) Kraus.....131, 204
Cronshey.....131
Perpetual Calendar, Edwards. (Letters) Achelis.....281
Edwards.....281
Physics, Beginnings of Nuclear. Darrow.....315-18
(Physiology) Electricity, Life, and Sensation. Lippitt.....404-08
Pool, Some Navy Electronics Problems and a Proposal for a Radar Patent. Dow.....87-91
Postwar Expansion, Technology in. Chevalier.....47-50
Postwar Period, The Engineer in the. Meily.....356-7
Postwar World, Electrical Engineering in the:
Part IX—Research—Creator of Employment. Hull.....25-7
Part X—Goals in Engineering Education. Wickenden.....65-8
Part XI—Electronics—An Industry Comes of Age. Knowles.....106-08
Part XII—Developments in Radio and Television. Baker.....152-5
(Parts I through VIII published in 1944)
Postwar World, Engineer's Role in. (Filler).....295
Power Industry, Application of Electronics in the Electric. Wagner.....323-7
Power Station in Switzerland, Large Generator for. (Photo).....298
Power Systems for Naval Vessels, Ship's Service. Rickover.....283-7
Problems and a Proposal for a Radar Patent Pool, Some Navy Electronics. Dow.....87-91
Profession, Organization of the Engineering. Fairman.....220-3
Letters.....380, 382
Program-Transmission Circuits, Wide-Band. Baker.....99-103
Progress in Europe, 50 Years of X-Ray.....444-8
Propulsion for Ships, Electric. Coleman.....246-9
Pump System, Experience With a Heat. (Letter) Walton, Williams.....421

## Q

Quality Control, Statistical Methods in. (Committee Reports):
Part I—Variability of Quality-Frequency Distributions.....181-2
Part II—Two Kinds of Measurement-Variables and Attributes.....249-50
Part III—Frequency Distribution for Setup Check of Process.....299
Part IV—Subgrouping of Data—Finding Causes of Trouble.....328-9
Part V—Variations to Be Expected in Sampling.....363-4
Part VI—Charts for Go-and-No-Go Inspection.....401-02
Part VII—Control Charts for Analysis of Variables.....448-50

## R

Radar Patent Pool, Some Navy Electronics Problems and a Proposal for a. Dow.....87-91
Radiation Patterns, Calculating Antenna. (Letters) Kraus.....131, 204
Cronshey.....131
(Radio) Aviation Communication Systems. Rantzel.....387-91
(Radio) Transmission Networks for Frequency Modulation and Television. Osborne.....392-7
Radiobroadcasting, 25th Anniversary of.....345-6
Ranks of Scientific Students, Depletion of. (Letter) Walker.....313
Recent Electron-Tube Development. Ingram.....22-4
Recreation, Electrical Essays for. Sohon.....294, 344
Letters.....381
Rectification With Inductive and Generative Loads, Voltage and Current Relations for Controlled. (Letter) Gerstmann.....468
Rectifiers and Inductive Co-ordination. McDonald.....60-4
Reply From Industry to the Colleges, A. Boring, Stevenson, McEachron.....398-400
Report on Collective Bargaining, AIEE.....239-41
Letter.....380
Report of the Board of Directors.....234-67
Research on Engineering Developments, Influence of. (Letter) Weller.....86
Research on Victory in War, The Influence of. Ward.....133-8
Research, One Facet of Naval Electrical. Seaman.....358-62

Resistance, Armature-Winding. (Letter) Lyon....45
Resistances of a Delta Mesh by Measurements Taken at the Junctions, Determination of the Individual. (Letter) Purnell....348
Responsibilities of Engineers, Civic....251–2
Letter....380
Resuscitation From Electric Shock, Use of Drugs in. Drinker....288–9
Riverside Generating Station, The. Fallon, Quarles....319–22
Romance of Engineering, The. Powel....207–10
Letter....314

## S

Safety, Lighting and. Logan....217–20
Scientific Importance of X Rays. Garland....437–44
Scientific Students, Depletion of Ranks of. (Letter) Walker....313
Scientific Truths and Their Use by Society. Addicott....295
Scientists in Government Service, Engineers and. Bennett....385–6
Selective Service in World War II. Hale....402–03
Sensation, Electricity, Life, and. Lippitt....404–08
Ships, Electric Propulsion for. Coleman....246–9
Ship's Service Power Systems for Naval Vessels. Rickover....283–7
(Ships) Speeding Repairs on Fighting Craft. (Filler)....408
Shock, Use of Drugs in Resuscitation From Electric. Drinker....288–9
Signaling and Control, Silent Electric. (Filler)....320
Society, Scientific Truths and Their Use by. Addicott....295
Soldering Temperatures Destroy Wires, High. (Filler)....24
Spectrometer, Electronics of the Mass. Hipple, Grove, Hickam....141–5
Standards for Steam Turbine Generators....180
Station, The Riverside Generating. Fallon, Quarles....319–22
Statistical Methods in Quality Control. (Committee Reports):
Part I—Variability of Quality-Frequency Distributions....181–2
Part II—Two Kinds of Measurement-Variables and Attributes....249–50
Part III—Frequency Distribution for Setup Check of Process....299
Part IV—Subgrouping of Data—Finding Causes of Trouble....328–9
Part V—Variations to Be Expected in Sampling....363–4
Part VI—Charts for Go-and-No-Go Inspection....401–02
Part VII—Control Charts for Analysis of Variables....448–50
Steam Turbine Generators, Standards for....180
Students, Depletion of Ranks of Scientific. (Letter) Walker....313
Survey of Co-operative Councils, A. Sanford....296–8
Survey of Dielectric Heating, A. Maiers....210–11
Switzerland, Large Generator for Power Station in. (Photo)....298
Systems for Naval Vessels, Ship's Service Power. Rickover....283–7

## T

Technology in Postwar Expansion. Chevalier....47–50
Television, Transmission Networks for Frequency Modulation and. Osborne....392–7
Temperatures, Electronic Control of Furnace. (Filler)....289
Theorem, Applications of Thevenin's. Richter....103–05
Letters....204, 381
Thevenin's Theorem, Applications of. Richter....103–05
Letters....204, 381
Transmission Circuits, Wide-Band Program-. Baker....99–103
Transmission Networks for Frequency Modulation and Television, Osborne....392–7
Truths and Their Use by Society, Scientific. Addicott....295
Tube Development, Recent Electron-. Ingram....22–4
Turbine Generators, Standards for Steam....180
Twenty-Fifth Anniversary of Radiobroadcasting....365–6

## U

Underground Factory, Lighting a British. (Filler)....155
Unit, New Frequency. (Letter) Hosmell....432
Use by Society, Scientific Truths and Their. Addicott....295
Use of Drugs in Resuscitation From Electric Shock. Drinker....288–9

## V

Value of Patents. (Letter) Schramm....380
Vessels, Ship's Service Power Systems for Naval. Rickover....283–7
Victory in War, The Influence of Research on. Ward....133–8
Voltage and Current Relations for Controlled Rectification With Inductive and Generative Loads. (Letter) Gerstmann....468

## W

War, The Influence of Research on Victory in. Ward....133–8
Wave Length, Change Color of Gems, X-Rays Alter. (Filler)....250
(Westinghouse) 25th Anniversary of Radiobroadcasting....365–6
Wide-Band Program-Transmission Circuits. Baker....99–103
Winding Resistance, Armature-. (Letter) Lyon....45
Wire, High Soldering Temperatures Destroy. (Filler)....24
World War II, Selective Service in. Hale....402–03

## X

X-Ray Developments, Industrial. Moriarty....433–5
X-Ray History and Development. Coolidge, Charlton....427–32
X-Ray in Industrial Inspection. (Photo)....426
X-Ray Progress in Europe, 50 Years of....444–6
X Ray, Some Experiences With the. Coolidge....423–6
X-Rays Alter Wave Length, Change Color of Gems. (Filler)....250
X Rays an Early Institute Topic....435
X Rays, Betatron Developed for Production of 100,000,000-Volt. (Filler)....450
X Rays, Scientific Importance of. Garland....437–44

Executive Committee, New York, N. Y., February 27, 1945....158

MEETINGS, DISTRICT EXECUTIVE COMMITTEE:
North West....410
Southern....454
Meetings, Future AIEE....31, 410, 452

MEETINGS, NATIONAL:
Summer National Technical, 1945
Closing Date for Discussion, July 15....224
Technical-Paper Program Announced....224
Winter National Technical, 1945
Aircraft Groups Active....118
Analysis of Registration....109
Army-Navy Group Co-operates in High-Frequency Conference....118
Circuit Breaker Session....120
Committees and Subcommittees Meet....119
Edison Medal Presented at Joint AIEE-IRE Session....110
Educational Program Planned at Conference on Statistical Methods....117
General Session Address, Research and the War Theme of....109
Generator Conference, Trend Toward High-Speed Relays Seen at....114
Held in New York....109
High-Frequency and Dielectric Heating, Conference on....117
Industrial Voltage Ratings Discussed in Conference....111
Instruments and Measurements, Diversified Program Session on....112
Power-Generation Program, Diverse Subjects on....116
Power-Station Auxiliaries Discussed at Conference Session....115
Program Announced....28
Safety Meeting, Drugs in Electric-Shock Treatment Topic at....120
Sections Committee Has Lengthy Agenda....119
Silicones as Electrical Insulation Interests Session....112
Temperature-Data Conflict, Conference Plans to Resolve D-C....117
Transmission and Distribution, Four Sessions Sponsored on....114
Winter Convention, 1946
Entertainment Features Removed for Convention....452
Frontiers of the Profession to Be Explored, New....409
Program Will Explore New Frontiers of Electrical Engineering....451
Tentative Schedule....452
Members for Life, Additions to List of....270
Members-for-Life Fund, Expense Awards Established From....31
Membership Letter. Howard....119
Membership, Transfers and Elections....41, 78, 127, 164, 198, 233, 275, 306, 338, 373, 415, 459
Memoriam, In, Charles Felton Scott....111
Memoriam, In, Paul Martyn Lincoln....113

Report of the Board of Directors ..... 254

## S

Scholarships (See Awards)
SECTION ACTIVITIES:
Annual Report for 1944-45 ..... 228
Arrowhead Subsection, Duluth, Established ..... 301
Boston Expands Technical Groups ..... 75
Charlotte Subsection, North Carolina Section Forms ..... 410
Dayton Section Hears Talk on Audible Signaling ..... 301
Engineers Council Promoted by Houston Section ..... 301
High-Frequency Heating Developments Reviewed ..... 302
Houston Works for City Betterment ..... 302
Iowa Meets With Collins Radio Association ..... 122
Lake Charles, La., Subsection in ..... 410
Maryland Meets ..... 271
Michigan Electronics Group Studies Speed Counter ..... 195
Michigan, Quiet Trolley Described Before ..... 122
Minnesota Aerotechnical Group Supplies Aero Information ..... 195
Montreal Electronics Group ..... 368
New York Lecture Courses ..... 368
Panhandle Subsection Organized in Texas ..... 271
Philadelphia Features Fun at Final Meeting ..... 270
Powel Says Age of Electricity Due After the War ..... 227
Record of Achievement by Schenectady Section ..... 227
Seattle Section Demonstrates B-29 Remote-Control Turret System. (Photo) ..... 410
Technical Groups Formed at Kansas City, New ..... 195
Technical Groups Formed in Southern District ..... 301
Work and Play Program at Seattle ..... 301
Section Operation, District Conferences on ..... 410
STANDARDS:
Aeronautical Standard Work Progresses ..... 122
A-C Power Circuit Breakers ..... 368
AIEE Standard No. 45A Withdrawn ..... 368
Code for Protection Against Lightning ..... 302
Condensing Steam Turbine-Generators ..... 368
Conduction in Stationary Contact Surfaces ..... 302
Electric Welding Standards Withdrawn ..... 302
Expulsion-Type Distribution Lightning Arresters 302
Preliminary Standard for Aircraft D-C Apparatus ..... 121
Recommended Practice for Electrical Installations on Shipboard ..... 302
Sign of Reactive Power ..... 302
Test Code for Synchronous Machines ..... 302, 367
Third Progress Report on AIEE Aeronautical Standards ..... 303
Turbine-Generator Standards and Specifications 302
Statistical Methods Announces Year's Program, Subcommittee on ..... 159
STUDENT BRANCH ACTIVITIES:
Annual Report for 1944-45 ..... 228
Subcommittees, AIEE Organizes New Planning ... 409
Supplement Announced, Contents of June 1945 ... 269
Supplement Contents Announced, 1945 December 454
Supplement Orders Early, Members Urged to Place ..... 409

## T

Technical Papers to Continue During Ban on Meetings, Publication of ..... 110

## W

Welding Forum in Detroit ..... 454

## Y

Year Book Issued, 1945 ..... 269

# 4. Non-AIEE News Index

Aeronautical Developments, Training in ..... 378
Aeronautical School, University of Maryland to Have ..... 81
Aeronautics Program at Princeton ..... 378
Allis-Chalmers Manufacturing Company
Gas Turbine Explained in Movie ..... 43
Aluminum Publication, New ..... 419
Ambrose Fleming's Life Spanned Radio's Development ..... 234

Elects Officers for 1945 ..... 85
American Institute of Mining and Metallurgical Engineers
Cancels General Meeting ..... 86
Officers Elected for 1945 ..... 130
American Iron and Steel Institute
Simplified Practice for Hot-Rolled Carbon-Steel Structural Shapes, Proposed ..... 418
American Physical Society
264th Meeting Held ..... 280
267th Meeting Held ..... 310
American Society for Testing Materials
Approves Materials ..... 309
American Society of Civil Engineers
George Seabury Dies; William N. Carey Succeeds Him ..... 280
American Society of Mechanical Engineers
Council Approves Proposed Organization Changes ..... 85
Holds Aviation Conference ..... 280
American Society of Refrigerating Engineers
Elects 1945 Officers ..... 45
Periodical Will Appear in Fall of 1945 ..... 86
American Standards Association
Announces Plan to Widen Scope of Activities ..... 45
Approves New Standard for Sound Level Meters . 130
Broadens Scope for Postwar Work ..... 312
Discuss Screw Thread Standards ..... 312
Plans Standards for Drafting Practices ..... 202
American Telephone and Telegraph Will Construct Relay Stations ..... 201
American Welding Society
Offices Meet ..... 419
Atomic-Bomb Research, 5,000 New Products and Procedures From ..... 375
Automatic Plotting Developed ..... 278
Awards (Includes Medals, Citations, Fellowships, Scholarships, and Prizes)
Alexanderson Receives Swedish Gold Medal ..... 203
Award Program Announced for Design Textbooks ..... 168
Compton, A. H., Receives 1945 Washington Award ..... 204
Durand Receives ASME Medal ..... 347
Engineering Scholarships Offered ..... 45
Fairburn Receives Sir John Kennedy Medal ..... 467
Fellowships at Ohio State University ..... 237
Fellowships Granted by Eastman Kodak ..... 377
Fellowships, More Eastman Kodak ..... 467
Holley Medal Awarded S. A. Moss ..... 347
Hoover Medal for 1945 Awarded to W. H. Harrison ..... 421
Industrial Science, Williams Honored for Advancing ..... 310
Jewett Fellowships Available ..... 420
John Fritz Medal for 1946 Awarded to Jeffries ..... 421
John J. Carty Medal, W. F. Durand Awarded ..... 236
Marston Award Presented to Paul Clapp ..... 310
Melville Prize Medal Awarded W. J. King ..... 347
Michigan College Offers Scholarships ..... 131
National Research Council, Predoctoral Fellowships Offered by ..... 417
Resistance-Welding Prize-Paper Contest Announced ..... 169
Scholarship Fund Honors Ex-President Gerard Swope ..... 310
Scientific High Command Donates Award to Academy ..... 203
Worcester Reed Warner Medal Awarded J. M. Juran ..... 347

## B

Bell System Facilities Devoted to War Effort ..... 167
Bell System to Construct Electronic Plant ..... 468
Bell Telephone Laboratories Buildings to Expand ... 236

## O

Ohio State, Curricula Changed at . . . . . 420
Oil Research, Centers for . . . . . 379

## P

Patent Commission's Recommendations, Bills Reflect . . . . . 200
Patent Planning Commission, Third Report of National . . . . . 417
Patentees' Licensing, Publicity for . . . . . 279
(Patents) Erratum . . . . . 347
Patents, To Protect . . . . . 347
Pennsylvania State College, Research Laboratories at . . . . . 310
Perpetual Calendar Proposed, Simplified . . . . . 169
Letter . . . . . 281
Philco, Television Program by . . . . . 236
Plans for Television and Frequency-Modulation Broadcasting, Stratosphere . . . . . 346
Plastic Announced, "Fortlex" New . . . . . 468
Plastic Lens Provide Larger Television Images . . . . 278
Plastics, Wilmington Company to Develop . . . . . 468
Polytechnic Institute of Brooklyn Aids Veterans . . . 377
Polytechnic Institute, War Developments Included in Curricula at . . . . . 419
POSTWAR ITEMS:
Bretton Woods Benefits Electronics Industry, Says Committee . . . . . 279
College Presidents Polled on Universal Military Training . . . . . 279
Developments for Peace, Muller Discusses . . . . . 235
FCC Releases Proposals for Frequency Allocation . . 80
Railroad Abandons Steam for Diesel Locomotives . . . . . 279
Salvage Science—An Imperative Need, To . . . . . 235
Scholarships for World of Tomorrow . . . . . 235
Scientific Research, Plan for . . . . . 235
Veteran Gets Jobs for Veterans, War . . . . . 235
Veterans, Advice for the . . . . . 313
Veterans From Colleges to Organize . . . . . 204
War Memorial for Cleveland . . . . . 312
Postwar World, Technology in . . . . . 419
Power Plants Designed for Europe, "Unit" . . . . . 345
Power Project for Oregon Planned . . . . . 202
Precision Measurements, Laboratory to Be Established for . . . . . 169
Princeton Students, New Library for . . . . . 467
Prizes (See Awards)
Products Exposition in Chicago . . . . . 466
Propeller, Ice Breakers Add Bow. (Photo) . . . . . 130
Puget Sound Council, Seattle Engineering Groups Form . . . . . 84
Puget Sound Power and Light Company Wins Annual Report Contest . . . . . 347
Pulse Time Modulation of Multiplex Telephone . . . . 463

## Q

Quality Control Methods at Iowa City, Course in . . . 379

## R

Radar Secret Revealed . . . . . 344
Radar Set Guards Coasts and Guides Ships, Latest Army . . . . . 377
(Radio Broadcasting) New Voice to Be Heard on Chilean Front . . . . . 201
(Radio Broadcasting) Short-Wave Station in New Brunswick. (Photo) . . . . . 201
Radio Communication for Trains . . . . . 344
Radio, Education Via University . . . . . 379
Radio Manufacturers Association
Cancels Winter Conference and Probably Trade Show . . . . . 85
Estimates Postwar Employment in Industry . . . . . 41
Radio Market Estimated, Canadian . . . . . 278
Radio to Augments Wire Services, Microwave . . . . . 462
Radios as Prizes for "GI's" . . . . . 347
Radio's Developments, Ambrose Fleming's Life Spanned . . . . . 234
Radiotelegraph Service Resumed . . . . . 421
Researches, Broader Training in Curriculum at . . . . 420
Research Center, Brants Work on . . . . . 379
Research, Centers for Oil . . . . . 379
Research Directory in Prospect, New . . . . . 310
Research Laboratories at Pennsylvania State College . . . . . 310
Research Men Meet . . . . . 419
Research on Steel Planned . . . . . 379
Russia Honors Science . . . . . 311
Rutgers Resumes Night Courses in Engineering . . . . 420

## S

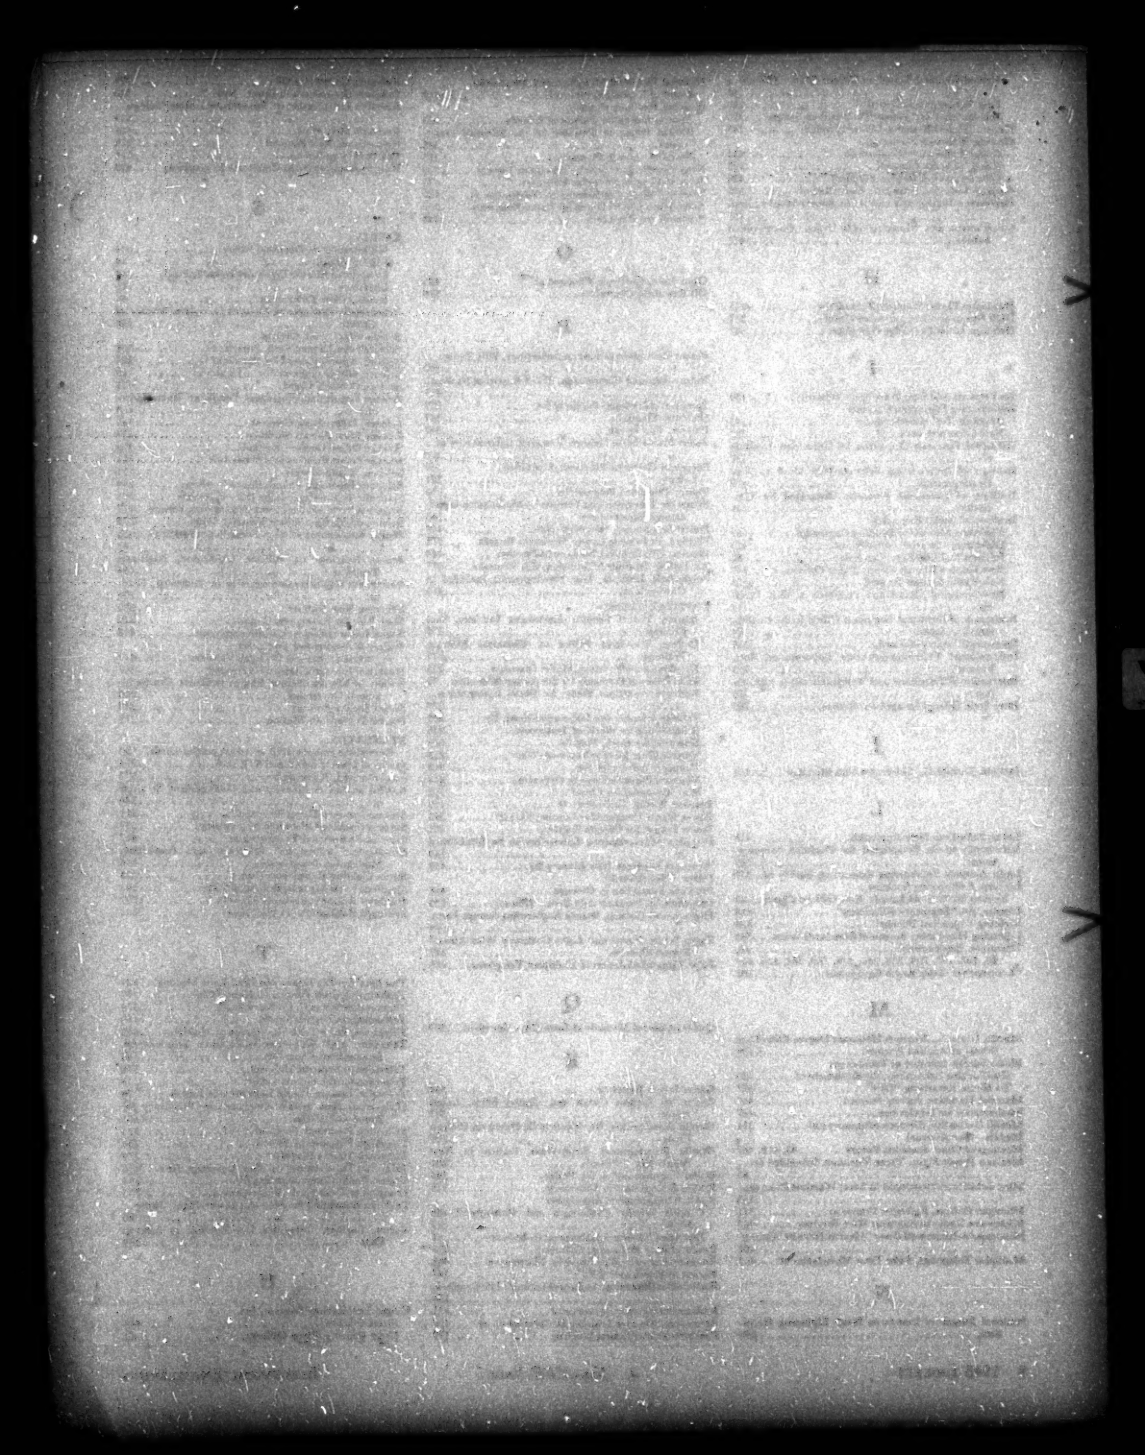
SAFETY:
Bibliography on Electrical Safety . . . . . 44
Electric Shock . . . . . 44
Fatalities in Electric Light and Power Industry . . . . 44
Literature . . . . . 45
Resuscitation Techniques . . . . . 44
Schenectady Engineering Council Completes History of Growth . . . . . 168
Scholarships (See Awards)
Science—An Urgent Need, Pursuit of . . . . . 308
Science, Appropriations for Pursuit of . . . . . 203
Science, Bibliography on Social Impact of . . . . . 418
Science Controls Urged . . . . . 419
Science Legislation, Engineers Testify at Senate Hearings on . . . . . 464
Science, Liberalizing General . . . . . 311
Science Must Attract Students . . . . . 237
Science Offers Choice—Sarnoff . . . . . 379
Science Points the Way to a Better Life . . . . . 313
Science, Russia Honors . . . . . 311
Scientific Research, Foundation to Develop . . . . . 348
Scientific Tolerance—Major Duty to Society . . . . . 311
Scientists Barred From Practice in Mexico, Foreign . . 377
Scientists Will Co-ordinate Research Work . . . . . 203
Seattle Engineering Groups Form Puget Sound Council . . . . . 84
Senate Hearings on Science Legislation, Engineers Testify at . . . . . 464
Shortage of Engineers Continues to Be Alarming, Critical . . . . . 234
Silicone, New Rubber . . . . . 379
Slide Rule for Resistance, Capacitance . . . . . 279
Social Impact of Science, Bibliography on . . . . . 418
Society of Automotive Engineers
Prosthetic Devices for Disabled Veterans . . . . . 419
Society of Industrial Designers Formed . . . . . 347
Society of Motion Picture Engineers Holds 57th Semi-annual Conference . . . . . 202
Soviet Society Formed . . . . . 347
Square D Plant for Mexico . . . . . 379
STANDARDS:
Committee Is Appointed to Advise on Standards . . 130
Statue of Liberty Signalized V-E Day . . . . . 234
Steel Planned, Research on . . . . . 379
Stevens as Aid to Industry and Management, Seminar at . . . . . 346
Stevens Institute Camp Reopened . . . . . 311
Stevens Institute Celebrates Anniversary . . . . . 237
Stevens, Professional Teamwork at . . . . . 467
Stratosphere Planes for Television and Frequency-Modulation Broadcasting . . . . . 346
Street Lighting Called Too Dim . . . . . 235
Synthetic Fuels Made by Bureau of Mines . . . . . 309
Synthetic Rubber, Advances Made in . . . . . 309
Synthetic Rubbers Put to Use, New . . . . . 202

## T

Tau Beta Pi—Eta Kappa Nu Hold Joint Meeting . . . 129
Technical Council Formed in Kansas City . . . . . 347
Technical Subjects Urged for Schools . . . . . 378
Technology in Postwar World . . . . . 419
Telephone, Pulse Time Modulation of Multiplex . . . 463
Television and Frequency-Modulation Broadcasting, Stratosphere Planes for . . . . . 346
Television at Syracuse University . . . . . 378
Television for the Future, Color . . . . . 234
Television Images, Plastic Lens Provide Larger . . . 278
(Television) New System Requires One Frequency for Sound and Vision . . . . . 463
Television Predicted, Boom in . . . . . 313
Television Program by Philco . . . . . 236
Television Station Planned . . . . . 379
Television Tube Assures 24-Hour Coverage, New . . . 466
Trains, Radio Communication for . . . . . 344
Transmitter Developed, Single-Crystal . . . . . 202
Turbines Scheduled for Mexican Power Plant, Three . . . . . 80
Turret, Engineer Describes Development of Electric Tank . . . . . 300

## U

United Engineering Trustees, Inc.
Elects Officers . . . . . 442
Issues Report; Elects Officers . . . . . 83



University of Iowa, Course in Quality Control Methods at ..... 379
University of Maryland to Have Aeronautical School ..... 81
University of Pennsylvania, Expansion at ..... 379
University of Southern California Needs Building for Engineering Students ..... 311
Utilities Association, New ..... 347

## V

Veteran Insignia ..... 398
Veterans at Michigan, Housing for ..... 467
Veterans at Stevens and Columbia, Special Courses for ..... 378
Veterans at Stevens, Guidance for ..... 467
Veterans at Yale, Homes for Married ..... 467
Veterans, Educational Advantages for ..... 377
(Veterans) Electrical Engineering for Service Men ..... 378
(Veterans) MIT to House Returning "GI's" ..... 377
Veterans, Polytechnic Institute of Brooklyn Aids ..... 377
Veterans, Prosthetic Devices for Disabled ..... 419
Veterans, Training Opportunities for ..... 468

## W

(War Loan)Helping to Raise one Billion ..... 237
WAR PROGRAM:
American Contributes to Pipe Line Feat ..... 312
Aviation Gas-Turbine Division Formed ..... 201
Bureau of Ships Creates Electronics Division ..... 80
Dummy Head Tests Heating Pads for Oxygen Masks ..... 277
Electrical Engineers, Government Needs ..... 200
Electric Power Will Hasten Italy's Industrialization ..... 200
Enemy Patents Licensed to Americans ..... 312
Engineers in Training for Pacific War ..... 312
Field-Wire Circuits Strung From Airplane ..... 277
Film Depicts Japanese Strategy ..... 278
Government Needs Electrical Engineers ..... 200
Holland, Shortage of Electricity in ..... 80
Homing Pigeons' Reactions to Radio Waves Tested ..... 80
Inventors Council Seeks Solutions to Navy Department Problems ..... 129
Invisible Dye Aids Tropicalization ..... 312
Interior of a C-47 Transport Airplane With Field-Wire Coils ..... 278
Learning-to-Fly Classes Formed ..... 235
Moore School, Distinguished Service Award for ..... 43
Parallel Generator Operation for Bomber Power Systems ..... 277
Patents Described in Abstracts, Seized Enemy ..... 129
Power, Cargo Ships Use Packaged. (Photo) ..... 166
Power-Generation Facilities, Allies in Italy Centralize ..... 166
Power Plant, Troopships Provided With Package ..... 43
Radio Powered by Two Watts Available in Holland ..... 129
Radio-Radar Equipment Discussed ..... 200
Radio Receivers for Enlisted Men Overseas ..... 312
Robot Cuts Pilot's Duties ..... 277
Rural Electrification Increased ..... 43
Signal Corps Has Wire-Laying Method for All Terrains ..... 166
Signal Corps Institutes Relay Radio in France ..... 80
Signal Equipment Made by Army, Substitutions in ..... 200
Telephone Facilities of Liberated Countries Are Restored ..... 200
Tramway Built to Evacuate Wounded on Italian Front ..... 200
Transmitter-Receiver Designed for Lifeboat Use ..... 129
Westinghouse Electric Corporation
Ceramic Insulation Developed From Zircon, New ..... 80
Laboratory Opens in West ..... 468
Magazine in Portuguese ..... 168
Mercury Lamp Improves Hangar Lighting. (Photo) ..... 44
New Name Adopted ..... 237
"Newsfront" Makes Debut ..... 202
Slide Film Course in Resistance Welding Control ..... 130
War Worker Earns Top Award ..... 310
Yank Soldier Wins Suggestion Award ..... 310
Wind Tunnel, Nerve Center for Western. (Photo) ..... 463
Windings for Motors, New ..... 278
Wire Recording, Demonstrate Uses of ..... 202

## X

X-Ray Diffraction Clinic Completed at Polytechnic Institute ..... 418

# II—TRANSACTIONS MATERIAL

(See page 2 for explanation)

## 1. Technical Subject Index

Absorption Characteristics of Large A-C Stator Windings, Insulation Resistance and Dielectric-. Askey, Johnson....347–51; disc. 458

Absorption Tests in Drying Out Large Generators, Use of Dielectric-. Marcroft....56–60; disc. 415

Accelerometer—Vibrometer for Instrument-Gyroscope Testing, A Tachometer—. Laurenson, Long....593–6; disc. 960

Adjustable Speed, Central-Station Auxiliary-Drive Motors for Constant and. Gibson....746–50; disc. 976

Air-Blast Circuit Breaker for 138,000-Volt Service, A Three-Cycle 3,500-Megavolt-Ampere. Byrd, Beall....229–32; disc. 463

Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and. Sporn, St. Clair....401–10; disc. 463

Air Circuit Breakers in A-C Railway Service, Compressed-. Wilcox, Harker....141–5; disc. 419

Air-Cooled Transformers, Dielectric Strength and Protection of Modern Dry-Type. Bellaschi, Beck....759–63; disc. 997

Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current, Optimum. Legg....709–12; disc. 969

Air Switch and the Principles Involved in Its Design, A New Outdoor. Graybill, Ferguson....583–6; disc. 953

(Air Transportation) An Interval and Dwell Tester for Bomb-Release Interval Controls. Long....648–51

(Air Transportation) Electrolytic Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service, Thompson, Mathes....295–9; disc. 443

(Air Transportation) Resonant-Circuit Constant-Current Regulators. Kevern....807–10; disc. 992

(Air Transportation) The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics. Weatherwax, Stamm....833–9

(Air Transportation) Treatment of High-Altitude Brushes by Application of Metallic Halides. Elsey....576–9

(Air Transportation) Vibration Insulation and Structural Rubber. Connon....324–9

Aircraft Alternator Drives, Governor Requirements for. Bolz, Levoy....534–40; disc. 947

Aircraft Alternators, Constant-Speed Drives for. Breitwieser....763–8; disc. 991

Aircraft Applications, A Current-Limiting Fuse for. Powell....541–5

Aircraft, Automatic Temperature Control for. Gund....730–4

Aircraft Cabin-Supercharger Drive, Speed-Control System for an. Godsey, Miner, Walley....37–40

Aircraft Circuit Breaker, A 208V/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated. Titus, Reifschneider....351–5

Aircraft, 400-Cycle Inverters for Military. Hayes, Ray....233–7

Aircraft Generators, Parallel Operation of Main-Engine-Driven 400-Cycle. Levoy....811–16; disc. 987

Aircraft Ignition Cables and Connectors, Simulated-High-Altitude Testing of. Race, Ross....20–4

Aircraft Illumination. Davies....28–30

Aircraft Motor, A 400-Cycle. Schwandt....908–12; disc. 948

Aircraft, Preferred Practices for Electric Control Devices for. Hottenroth....197–200; disc. 444

Aircraft Systems, Instability in D-C. Bunce, Cunningham, Davidson....786–91

Aircraft Systems, Selenium Power Rectifiers for A-C. Emley....596–600

Aircraft, The Amplidyne Generator Applied to Speed-Controlled Electric Gun Turrets for. Zahorsky....221–5; disc. 436

Aircraft Transformers, Effect of Altitude on Temperature Rise of. Monninger....251–2

Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-Power-Distribution Scheme With. Bailey....121–3; disc. 684

A-C Aircraft Systems, Selenium Power Rectifiers for. Emley....596–600

A-C Arc Welding, Power Supply for. Welch, Wyer....116–20; disc. 435

A-C Railway Service, Compressed-Air Circuit Breakers in. Wilcox, Harker....141–5; disc. 419

A-C Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion, Study of. Sheret, Granholm....264–8; disc. 483

A-C Stator Windings, Insulation Resistance and Dielectric-Absorption Characteristics of Large. Askey, Johnson....347–51; disc. 458

Alternator Drives, Governor Requirements for Aircraft. Bolz, Levoy....534–40; disc. 947

Alternators, Constant-Speed Drives for Aircraft. Breitwieser....763–8; disc. 991

Altitude Brushes by Application of Metallic Halides Treatment of High-. Elsey....576–9

Altitude on Temperature Rise of Aircraft Transformers, Effect of. Monninger....251–2

American Gas and Electric Company, Lightning Investigation on 132-Kv System of. Gross, Lippert....76–84; disc. 474

Ampere Air-Blast Circuit Breaker for 138,000 Volt Service, A Three-Cycle 3,500-Megavolt-. Byrd, Beall....229–32; disc. 463

Amplidyne Generator Applied to Speed-Controlled Electric Gun Turrets for Aircraft, The. Zahorsky....221–5; disc. 436

Amplidyne Generator, Fundamentals of the. Boyer....873–81

Amplifier, The Resistance-Coupled. Cowles....359–65

Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the. Check....215–20; disc. 450

Analogy, Determination of Transient Shaft Torques in Turbine Generators by Means of the Electrical-Mechanical. McCann, Warren, Griner....51–6; disc. 492

Analysis and Design of a D-C Selsyn System. Manildi....512–16; disc. 946

Analysis of Arc-Welding Reactors. Wheeler....87–90; disc. 434

Anode-Circuit-Breaker Design and Performance Criteria. Boehne, Atwood....337–45; disc. 437

Apparatus Life Quality, Statistical Methods in the Development of. Ferrell....700–03; disc. 998

Apparatus, Lightning Arresters for Distribution. Beck, Forbes....719–24; disc. 970

Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric. Higgins....190–4; disc. 493

Application of Capacitors for Power-Factor Improvement of Induction Motors. Bloomquist, Boice....274–8

Application of Electric Equipment for Ship-Propeller Milling Machine. Morton, Rutemiller....205–08; disc. 453

Application of Quality Control to Resistance Welding. Hobson, Inglis, McCants....573–5; disc. 951

Application of Silicone Resins to Insulation for Electric Machinery, The. DeKlep, Hill, Moses....94–8; disc. 440

Application, Selsyn Design and. Johnson....703–08; disc. 960

Applications, A Current-Limiting Fuse for Aircraft. Powell....541–5

Applications, and Economics, Frequency Changers—Characteristics. Crary, Easley....351–8; disc. 416

Arc-Backs in Rectifier Circuits—Artificial Arc-Back Tests. Evans, Madia....303–11; disc. 439

Arc Duration, An Interval Timer for. Quill....237–40

Arc Rectifiers for Railroads, Mercury-. Watkins....84–6; disc. 419

Arc Welding, Power Supply for A-C. Welch, Wyer....116–20; disc. 435

Arc-Welding Reactors, Analysis of. Wheeler....87–90; disc. 434

Arc Welding, The Power-Distribution Problem in. Pierce, Smith....178–84; disc. 438

Armatures, Rewinding Commutator-Type Traction. Greene, Stafford, Gentilini....563–9; disc. 943

Arrester Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of Lightning-. Goldman....607–10; disc. 966

Arresters for Distribution Apparatus, Lightning. Beck, Forbes....719–24; disc. 970

Artificial Arc-Back Tests, Arc-Backs in Rectifier Circuits—. Evans, Madia....303–11; disc. 439

Attenuation of Coaxial Radio-Frequency Cable, The S-Function Method of Measuring. Stewart....616–19, 938–9; disc. 964

Automatic Load Control for Turbine Generators. Crever, Jackson....656–60

Automatic Regulation of Turbine Generators to Relieve Power-Supply Systems of Steel-Mill Load Swings, Eberhardt, Harrison, Kohn, Darling....751–8

(Automatic Stations) Supervisory Control for New Chicago Subway. Derr, Buck, Stoos....10–16; disc. 457

(Automatic Stations) The Combination of Supervisory Control With Other Functions on Power-Line Carrier Channels. Cheek, Derr....241–6

Automatic Temperature Control for Aircraft. Gund....730–4

Auxiliaries, Electric Drives for Steam-Electric Generating-Station. Brownlee, Ehri....741–5; disc. 976

Auxiliary-Drive Motors for Constant and Adjustable Speed, Central-Station. Gibson....746–50; disc. 976

Auxiliary Drives in Steam-Electric Stations, Power Systems for. McClure, Whittlesey....844–51; disc. 976

Auxiliary Equipment and Systems, Modern Practice in Power-Plant. Muller....868–72; disc. 976

Auxiliary-Power Supply for Generating Stations, McCallum....693–5; disc. 976

Axis Equivalent Circuits of the Synchronous Machine, The Direct- and Quadrature. Rankin....861–8

### B

Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side. Check....215–20; disc. 450

Basic Concepts of Moving-Magnet-Instrument Rotors, Mendelsohn....529–34; disc. 947

(Basic Sciences) Eddy-Current Resistance of Multi-layer Coils. Long....712–14

(Basic Sciences) Ferroinductance as a Variable Electric-Circuit Element. Ryder....671–8; disc. 962

(Basic Sciences) Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section. Higgins....190–4; disc. 493

(Basic Sciences) Power Geometry of General Transmission Systems. Altar....312–17; disc. 493

(Basic Sciences) Resistance and Capacitance Relations Between Short Cylindrical Conductors. ReQua....724–30; disc. 962

(Basic Sciences) The Self-Inductance of a Toroidal Coil Without Iron. Dwight....805–06; disc. 999

(Basic Sciences) Two-Phase Co-ordinates of a Four-Phase Network. Kimbark....7–9

Biased-Core-Current-Transformer Design Method. Specht....635–40

Bimetal, Tapered-Thickness. Elmer....641–5; disc. 962

Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of Lightning-Arrester. Goffman....607–10; disc. 966

Board of Directors, Report of the....1001–16

Bomb-Release Interval Controls, An Interval and Dwell Tester for. Long....648–51

Braking With Traction Motors, Dynamic. Riley, Woods....517–19

Breaker, A High-Capacity High-Voltage Three-Cycle Oil Circuit. Byrd, Rietz....160–3; disc. 463

Breaker, A 208V/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated Aircraft Circuit. Titus, Reifschneider....351–5

Breaker Design and Performance Criteria, Anode-Circuit-. Boehne, Atwood....337–45; disc. 437

Breaker for 138,000-Volt Service, A Three-Cycle 3,500-Megavolt-Ampere Air-Blast Circuit. Byrd, Beall....229–32; disc. 463

Breaker, New Solenoid Mechanism for Magne-Blast. Wyman, Keagy....268–74; disc. 448

Breakers in A-C Railway Service, Compressed-Air Circuit. Wilcox, Harker....141–5; disc. 419

Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit. Sporn, St. Clair....401–10; disc. 463

Brush Performance, Maintenance of Good. Kalb....819–25; disc. 998

Brushes by Application of Metallic Halides, Treatment of High-Altitude. Elsey....576–9

Bus-Bar Industrial Distribution Systems: an Examination of Available Data, The Design of. Higgins....385–400; disc. 446

Bus-Tie Switches, Improving Stability by Rapid Closing of. Kimbark....61–6; disc. 436

Bushing Current Transformer for Metering, Orthmeyer....717–40, disc. 997

### C

Cabin-Supercharger Drive, Speed-Control System for an Aircraft. Godsey, Miner, Walley....37–40

Pages 359–494 comprise the June 1945 "Supplement to Electrical Engineering—Transactions Section"; pages 873–1000 the December 1945 Supplement; pages beyond 1000 appear only in the 1945 Transactions volume.

Cable and Wire Spans Using Catenary Formulas, Sag and Tension Calculations for. Nash, Nash.....685–92; disc. 984

Cable-Sheath Corrosion, Study of A-C Sheath Currents and Their Effect on Lead-. Sherer, Granbois.....264–8; disc. 483

Cable, The S-Function Method of Measuring Attenuation of Coaxial Radio-Frequency. Stewart.....616–19; disc. 966

Cables and Connectors, Simulated-High-Altitude Testing of Aircraft Ignition. Race, Ross.....20–6

Cables, Electrolysis and Corrosion of Underground Power-Systems. Gorman.....329–36; disc. 477

Cables, Report of Conference on Radio-Frequency.....911–41

Calculating Fault Currents on Rural Distribution Systems, Graphical Method of. Linder.....16–19; disc. 446

Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for. Higgins.....190–4; disc. 493

Calculations for Cable and Wire Spans Using Catenary Formulas, Sag and Tension. Nash, Nash.....685–92; disc. 984

Calibrations, A Study of Wave Shapes for Radio-Noise-Meter. Frick.....890–901; disc. 969

Canadian National Railways Terminal, Montreal, Canada, Electrification and Signaling of the. Gage.....41–6; disc. 417

Capacitance Relations Between Short Cylindrical Conductors, Resistance and. ReQua.....724–30; disc. 962

Capacitor Single-Phase Motor, A Generalized Circle Diagram for a Four-Terminal Network and Its Application to the. Tarboux.....881–9; disc. 943

Capacitors for High-Frequency Induction-Heating Circuits. Chirk, Melville.....791–6; disc. 969

Capacitors for Power-Factor Improvement of Induction Motors, Applications of. Bloomquist, Bolce.....274–8

Capacity—5,000,000 Kva, The Next Step in Interrupting. Hill, Leeds.....317–23; disc. 463

Capacity High-Voltage Three-Cycle Oil Circuit Breaker, A High-. Byrd, Rietz.....160–3; disc. 463

Capacity Investment, Evaluation of Electric Distribution Losses in Terms of Generating-Station-. Morrara.....1–7; disc. 411

Carrier Channels, Power-Line. Brown.....246–51

Carrier Channels, The Combination of Supervisory Control With Other Functions on Power-Line. Cheek, Derr.....241–6

Carrier-Current Relaying, Phase-Comparison. McConnell, Cramer, Seeley.....825–33; disc. 973

Carrier Transmission, Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line. Cheek.....215–20; disc. 450

Case, Response Time and Lag of a Thermometer Element Mounted in a Protecting. Goodwin.....665–70; disc. 950

Catenary Formulas, Sag and Tension Calculations for Cable and Wire Spans Using. Nash, Nash.....685–92; disc. 984

Central-Station Motor-Drive Systems for Constant and Adjustable Speed. Gibson.....746–50; disc. 976

Changers—Characteristics, Applications, and Economics, Frequency. Crary, Easley.....351–8; disc. 416

Channels, Power-Line Carrier. Brown.....246–51

Channels, The Combination of Supervisory Control With Other Functions on Power-Line Carrier, Cheek, Derr.....241–6

Characteristics, Applications, and Economics, Frequency Changers—. Crary, Easley.....351–8; disc. 416

Characteristics, Coincidence-Factor Relationships of Electric-Service-Load. Bary.....623–9

Characteristics of Large A-C Stator Windings, Insulation Resistance and Dielectric-Absorption. Askey, Johnson.....347–51; disc. 458

Characteristics of Oil-Insulated Transformers, Standards and Insulation. Vogel.....167–71; disc. 431

Characteristics of Radio-Frequency Cables, Shielding. Fluharty.....929–30

Chemical Contamination as Causes of Electrical-Insulation Failure. Braithwaite, Moses.....580–3; disc. 945

Chicago Plant's Electric-Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge, Bailey.....131–3; disc. 484

Chicago Subway, Supervisory Control for New. Derr, Buck, Stout.....10–16; disc. 457

Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A Generalized, Tarboux.....881–9; disc. 943

Circuit Breaker, A High-Capacity High-Voltage Three-Cycle Oil. Byrd, Rietz.....160–3; disc. 463

Circuit Breaker, A 264-V/120-Volt 120-Ampere Three-Pole 600-Cycle Electrically Operated Aircraft. Thun, Reifenschneider.....551–9

Circuit-Breaker Design and Performance Criteria, Axode-. Boehne, Atwood.....337–45; disc. 437

Circuit Breaker for 138,000-Volt Service, A Three-Cycle 5,500-Megavolt-Ampere Air-Blast. Byrd, Beall.....229–32; disc. 443

Circuit Breakers in A-C Railway Service, Compressed-Air. Wilcox, Harker.....141–5; disc. 419

Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv. Spots, St. Clair.....401–10; disc. 463

Circuit Constant-Current Regulators, Resonant-. Kevers.....807–10; disc. 992

Circuit Element, Ferroinductance as a Variable Electric-. Ryder.....971–6; disc. 982

Circuits—Artificial Arc-Back Tests, Arc-Backs in Rectifier, Evans, Maslin.....303–11; disc. 459

Circuits of the Synchronous Machine, The Direct- and Quadrature-Axis Equivalent. Rankin.....861–8

Circuits on Self-Propelled Vehicles, Grounding of. Ewing.....48–50; disc. 417

Circuits, Transient Response of Controlled Rectifier. Chin, Walter.....208–14

Closing of Bus-Tie Switches, Improving Stability by Rapid. Kimbark.....61–4; disc. 456

Coaxial Radio-Frequency Cable, The S-Function Method of Measuring Attenuation of. Stewart.....616–19, 938–9; disc. 966

Coil Without Iron, The Self-Inductance of a Toroidal. Dwight.....805–06; disc. 909

Coils, Eddy-Current Resistance of Multilayer. Long.....712–18

Coils for Cylindrical Nonmagnetic Loads, Design of Induction-Heating. Vaughan, Williamson.....587–92; disc. 965

Coils Subject to Superposed Direct Current, Optimum Air Gap for Various Magnetic Materials in Cores of. Legg.....709–12; disc. 969

Coincidence-Factor Relationships of Electric-Service-Load Characteristics. Bary.....623–9

Combination of Supervisory Control With Other Functions on Power-Line Carrier Channels, The. Cheek, Derr.....241–6

(Committee Report) Guides for Operation of Transformers, Regulators, and Reactors.....797–806; disc. 957

Committees for 1945–46, Officers and.....1017–21

(Communication) Judging Mica Quality Electrically. Coates.....735–41

(Communication) Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current. Legg.....709–12; disc. 969

(Communication) Study of Wave Shapes for Radio-Noise-Meter Calibrations, A. Frick.....890–901; disc. 969

(Communication) The Resistance-Coupled Amplifier. Cowles.....1005–15

(Communication) The S-Function Method of Measuring Attenuation of Coaxial Radio-Frequency Cable. Stewart.....616–19; disc. 966

(Communication) The Tapered Transmission Line. Minor.....545–6

Commutator-Type Traction Armatures, Rewinding. Greene, Stafford, Gentilini.....563–9; disc. 943

Comparison Carrier-Current Relaying, Phase-. McConnell, Cramer, Seeley.....825–33; disc. 973

Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A. Cheek.....215–20; disc. 450

Comparison Testing, Winding-Fault Detection and Location by Surge-. Moses, Harter.....409–503; disc. 945

Components as Applied to the Single-Phase Induction Motor, Symmetrical. Suhr.....651–6; disc. 958

Components, Losses in Radio-Frequency-Cable. Ragan.....927

Compounds for Insulating Electric Machines, Organo-Silicon. Kauppi, Moses.....90–3; disc. 457

Compressed-Air Circuit Breakers in A-C Railway Service. Wilcox, Harker.....141–5; disc. 419

Concepts of Moving-Magnet-Instrument Rotors, Basic. Mendelsohn.....529–34; disc. 947

Conductors, Resistance and Capacitance Relations Between Short Cylindrical. ReQua.....724–30; disc. 962

Conference on Radio-Frequency Cables, Report of.....911–41

Connectors, Simulated-High-Altitude Testing of Aircraft Ignition Cables and. Race, Ross.....20–6

Considerations in Radio-Frequency-Cable Design, General. Wentz.....925–6

Constant-Current Regulators, Resonant-Circuit. Kevers.....807–10; disc. 992

Constant-Speed Drives for Aircraft Alternators. Breitwieser.....763–8; disc. 991

Contamination as Causes of Electrical-Insulation Failure, Chemical. Braithwaite, Moses.....580–3; disc. 945

Control Devices for Aircraft, Preferred Practices for Electric-. Hemstreet.....197–200; disc. 444

Control for Aircraft, Automatic Temperature. Gund.....730–4

Control for New Chicago Subway, Supervisory. Derr, Buck, Stout.....10–16; disc. 457

Control for Turbine Generators, Automatic Load-Dower, Jackson.....656–60

Control, Heating of Motor-Motor Starting Resistors, Industrial. Leland, Rader.....695–9; disc. 981

Control of Electrical-Insulating Varnishes. Gibson, Braithwaite.....520–4

Control of Load, Frequency, and Time of Interconnected Systems. Duff.....78–86; disc. 999

Control System for an Aircraft Cabin-Supercharger Drive, Speed-. Godsey, Miner, Walley.....37–40

Control to Resistance Welding, Application of Quality-. Hobson, Inglis, McCann.....573–5; disc. 951

Control, Variable-Unbalanced-Voltage. Wickersham.....98–102; disc. 449

Control With Other Functions on Power-Line Carrier Channels, The Combination of Supervisory. Cheek, Derr.....241–6

Controlled Position Regulator for Propeller Milling Machine, Tracer-. Hanna, Osbon, Hartley.....201–05; disc. 452

Controlled Rectification With Inductive and Generative Loads, Voltage and Current Relations for. Puchlowski.....255–60; disc. 442

Controlled Rectifier Circuits, Transient Response of. Chin, Walter.....208–14

Controlling Quality, Statistical Tools for. Manuele, Goffman.....524–8; disc. 949

Controls, An Interval and Dwell Tester for Bomb-Release Interval. Long.....648–51

Co-ordinates of a Four-Phase Network, Two-Phase. Kimbark.....7–9

Core-Current-Transformer Design Method, Biased-. Specht.....635–40

Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature Distribution in Transformer. Higgins.....190–4; disc. 493

Cores of Coils Subject to Superposed Direct Current, Optimum Air Gap for Various Magnetic Materials in. Legg.....709–12; disc. 969

Cores, Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and. Trickey.....842–4; disc. 998

Corona-Initiation Measurements on Polyethylene and Rubber Cables. Depackh.....939–40

Corona Voltmeter, A. Widmer.....940–1

Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service, Electrolytic. Thompson, Mathes.....295–9; disc. 445

Corrosion of Underground Power-System Cables, Electrolysis and. Gorman.....329–36; disc. 479

Corrosion, Study of A-C Sheath Currents and Their Effect on Lead-Cable-Sheath. Sherer, Granbois.....264–8; disc. 483

Corrosiveness of Soil Waters, Galvanic. Phelps, Kahn.....156–9; disc. 482

Cost Studies of 69- to 230-Kv Underground Power-Transmission Systems and Tie Lines. Holm.....852–60

Coupled Amplifier, The Resistance-. Cowles.....359–65

Criteria, Anode-Circuit-Breaker Design and Performance. Boehne, Atwood.....337–45; disc. 437

Cross Section, Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular. Higgins.....190–4; disc. 493

Current-Limiting Fuse for Aircraft Applications, A. Powel.....541–5

Current Relations for Controlled Rectification With Inductive and Generative Loads, Voltage and. Puchlowski.....255–60; disc. 442

Current Resistance of Multilayer Coils, Eddy-. Long.....712–18

Current-Transformer Design Method, Biased-Core-. Specht.....635–40

Current Transformer for Metering, Ortho-magnetic Bushing. Boyajian, Camilli.....197–201; disc. 427

Currents and Their Effect on Lead-Cable-Sheath Corrosion, Study of A-C Sheath. Sherer, Granbois.....264–8; disc. 483

Currents on Rural Distribution Systems, Graphical Method of Calculating Fault. Linder.....16–19; disc. 446

Currents, Rectifier Fault. Harskind, Kellogg.....145–50; disc. 441

Cylindrical Conductors, Resistance and Capacitance Relations Between Short. ReQua.....724–30; disc. 962

Cylindrical Nonmagnetic Loads, Design of Induction-Heating Coils for. Vaughan, Williamson.....587–92; disc. 965

## D

Damping and Synchronizing Torques of Power Relays. Concordia, Kron.....366–71; disc. 498

Damping Effect of D-C Motor Armature Losses on Vibrations Produced in Drive Shafts by Large Propellers. Lipman.....51–7

Data, The Design of Bus-Bar Industrial Distribution System: an Explanation of Available. Hughes.....385–400; disc. 484

Design, A New Outdoor Air Switch and the Principles Involved in Its. Graybill, Ferguson. 563–6; disc. 953
Design and Application, Selsyn. Johnson. . . . . 703–08; disc. 960
Design and Performance Criteria, Anode-Circuit-Breaker. Boehne, Atwood. . . . . 337–45; disc. 437
Design Considerations of High-Frequency Twin-Conductor Cable. Greenfield. . . . . 932–3
Design, General Considerations in Radio-Frequency-Cable. Wentz. . . . . 925–6
Design Method, Biased-Core-Current-Transformer. Specht. . . . . 535–40
Design of a D-C Selsyn System, Analysis and. Manildi. . . . . 512–16; disc. 946
Design of Bus-Bar Industrial Distribution Systems: an Eptiomination of Available Data. Higgins. . . . . 385–400; disc. 486
Design of Induction-Heating Coils for Cylindrical Non-magnetic Loads. Vaughan, Williamson. . . . . 587–92; disc. 965
Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack. . . . . 103–07
Detection and Location by Surge-Comparison Testing, Winding-Fault. Moses, Harter. 499–503; disc. 945
Detection Methods as Applied to Distribution Transformers, Impulse-Failure-. Stewart, Holcomb. . . . . 640–44; disc. 956
Determination of Transient Shaft Torques in Turbine Generators by Means of the Electrical-Mechanical Analogy. McCann, Warren, Criner. 51–6; disc. 492
Development and Manufacture, Statistical Methods Applied to Insulator. Taylor. . . . . 495–9; disc. 952
Development of Apparatus Life Quality, Statistical Methods in the. Ferrell. . . . . 700–03; disc. 998
Devices. Dynamic Measurements on Electromagnetic. Norton. . . . . 151–6
Devices for Aircraft, Preferred Practices for Electric Control. Hottenroth. . . . . 197–200; disc. 444
Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A Generalized Circle. Tarboux. . . . . 881–9; disc. 943
Diagrams, New Transmission-Line. Schwager, Wang. . . . . 610–15; disc. 955
Dielectric-Absorption Characteristics of Large A-C Stator Windings, Insulation Resistance and. Askey, Johnson. . . . . 347–51; disc. 458
Dielectric-Absorption Tests in Drying Out Large Generators, Use of. Marcroft. . . . . 56–60; disc. 415
(Dielectric Heating) Capacitors for High-Frequency Induction-Heating Circuits. Clark, Scoville. . . . . 791–6; disc. 995
Dielectric Heating, The Role of Frequency in Industrial. Scott. . . . . 558–62
Dielectric Strength and Life of Impregnated-Paper Insulation, The. Part IV. Whitehead. Kopper. . . . . 171–7; disc. 477, 942
Dielectric Strength and Protection of Modern Dry-Type Air-Cooled Transformers. Bellaschi, Beck. . . . . 759–63; disc. 997
Dielectric Strength of Polyethylene. Del Mar. 918–19
Direct- and Quadrature-Axis Equivalent Circuits of the Synchronous Machine, The. Rankin. . . . . 861–6
D-C Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of. Litman. . . . . 31–7
Direct Current, Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed. Legg. . . . . 709–12; disc. 969
D-C Selsyn System, Analysis and Design of a. Manildi. . . . . 512–16; disc. 946
Distribution Apparatus, Lightning Arresters for. Beck, Forbes. . . . . 719–24; disc. 970
(Distribution) Electrolysis and Corrosion of Underground Power-System Cables. Gorman. . . . . 329–36; disc. 479
(Distribution) Galvanic Corrosiveness of Soil Waters. Phelps, Kahn. . . . . 156–9; disc. 482
(Distribution) Guides for Operation of Transformers, Regulators, and Reactors. (Committee Report). . . . . 797–806; disc. 957
Distribution Ideas as Applied in a Large War Plant, Modern Electric-Power-. Kaufmann, Kieb. . . . . 279–87; disc. 488
Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature. Higgins. . . . . 190–4; disc. 493
Distribution Losses in Terms of Generating-Station-Capacity Investment, Evaluation of Electric. Mortara. . . . . 1–7; disc. 411
Distribution of Lightning Flashes to Transmission Lines, The Frequency of Occurrence and the. Golde. . . . . 902–10; disc. 982
(Distribution) Oil Stresses in Impregnated-Paper Insulation. Whitehead. . . . . 555–7; disc. 955
Distribution Power Supply, When the Welding Load Outgrows the. Clark, Stearns. . . . . 645–8; disc. 964
Distribution Problem in Arc Welding, The Power-. Pierce, Smith. . . . . 178–84; disc. 435
(Distribution) Sag and Tension Calculations for Cable and Wire Spans Using Catenary Formulas. Nash, Nash. . . . . 685–92; disc. 984
Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-Power-. Bailey. . . . . 121–3; disc. 484
(Distribution) Study of A-C Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion. Sherer, Granbois. . . . . 264–8; disc. 483
Distribution Systems: an Eptiomization of Available Data, The Design of Bus-Bar Industrial. Higgins. . . . . 385–400; disc. 486
Distribution Systems, Graphical Method of Calculating Fault Currents on Rural. Linder. . . . . 16–19; disc. 446
Distribution Systems, Improved Fault Protection for Rural. Van Ryan. . . . . 261–3
(Distribution) The Dielectric Strength and Life of Impregnated-Paper Insulation—Part IV. Whitehead, Kopper. . . . . 171–7; disc. 477, 942
Distribution Transformers, Impulse-Failure-Detection Methods as Applied to. Stewart, Holcomb. . . . . 640–44; disc. 956
Dodge Chicago Plant's Electric-Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery. Bailey. . . . . 121–3; disc. 484
(Domestic and Commercial Applications) Coincidence-Factor Relationships of Electric-Service-Load Characteristics. Bary. . . . . 623–9
Drive Shafts by Large Propellers, Damping Effect of D-C Marine Propulsion Motors on Vibrations Produced in. Litman. . . . . 31–7
Drive, Speed-Control System for an Aircraft Cabin-Supercharger. Godsey, Miner, Walley. . . . . 37–40
Drives, Governor Requirements for Aircraft Alternator. Boice, Levoy. . . . . 334–40; disc. 947
Drives in Steam-Electric Stations, Power Systems for Auxiliary. McClure, Whittlesey. 844–51; disc. 976
Drop Produced by Resistance Welders, Line. Longini. . . . . 619–23; disc. 963
Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and Cores, Wound and. Trickey. . . . . 842–4; disc. 998
Duration, An Interval Timer for Arc. Quill. . . . 237–40
Dwell Tester for Bomb-Release Interval Controls, An Interval and. Long. . . . . 648–51
Dynamic Braking With Traction Motors. Riley, Woods. . . . . 317–19
Dynamic Measurements on Electromagnetic Devices. Norton. . . . . 151–6

Heat-Flow Effects in a Resistance-Type Thermometer. Millar. . . . . 670-85
Heating Circuits, Capacitors for High-Frequency Induction- Clark, Scoville. . . . 791-6; disc. 995
Heating Coils for Cylindrical Nonmagnetic Loads, Design of Induction-. Vaughan, Williamson. . . . . 587-92; disc. 965
Heating of Moving Magnetic Strip, Induction-. Baker. . . . . 184-9
Heating of Sheet-Metal Starting Resistors, Industrial Control. Leland, Rader. . . . . 695-9; disc. 961
Heating, The Role of Frequency in Industrial Dielectric. Scott. . . . . 558-62
Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of. Sporn, St. Clair. . . . . 401-10; disc. 463
High-Altitude Brushes by Application of Metallic Halides, Treatment of. Elsey. . . . . 576-9
High-Altitude Testing of Aircraft Ignition Cables and Connectors, Simulated-. Race, Ross. . . . . 20-6
High-Capacity High-Voltage Three-Cycle Oil Circuit Breaker, A. Byrd, Rietz. . . . . 160-3; disc. 463
High-Frequency Induction-Heating Circuits, Capacitors for. Clark, Scoville. . . . . 791-6; disc. 995
High-Frequency Twin-Conductor Cable, Design Considerations of. Greenfield. . . . . 932-5
High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty. Sporn, St. Clair. . . . . 401-10; disc. 463
High-Temperature Induction Motors, Rating of. Alger, Jones. . . . . 300-02; disc. 458
High Voltage, A Portable Instrument for Measuring Insulation Resistance at. Atkinson, Taylor. . . . . 164-7; disc. 428
High-Voltage 138-Cycle Oil Circuit Breaker, A High-Capacity. Byrd, Rietz. . . . . 160-3; disc. 463
High-Voltage Transmission Lines, Nine Years' Experience With Ultrahigh-Speed Reclosing of. Sporn, Muller. . . . . 225-8; disc. 445
Horsepower Motors, Investigation of Hot-Spot Temperatures in Fractional-. Hirsch, Munier, Schmidt, Wightman, Himebrock, Lloyd, Coffman, Potter. . . . . 128-36; disc. 421
Horsepower Motors, Investigation of Hot-Spot Temperatures in Integral. Hildebrand, Cain, Phillips, Hough, Roswog, Potter. . . . . 124-8; disc. 421
Hot-Spot Temperatures in Fractional-Horsepower Motors, Investigation of. Hirsch, Munier, Schmidt, Wightman, Himebrock, Lloyd, Coffman, Potter. . . . . 128-36; disc. 421
Hot-Spot Temperatures in Integral-Horsepower Motors, Investigation of. Hildebrand, Cain, Phillips, Hough, Roswog, Potter. . . . . 124-8; disc. 421
Hydrolyzed-Wood and Paper-Base Plastics, The Electrical Resistivity of Resin-Treated Wood and Laminated. Weatherwax, Stamm. . . . . 833-8

## I

Ignition Cables and Connectors, Simulated-High-Altitude Testing of Aircraft. Race, Ross. . . . . 20-6
Ignitron Rectifiers for Three-Wire Service, Design of Sealed. Morack. . . . . 103-07
Illumination, Aircraft. Davies. . . . . 26-30
Impedances of Synchronous Machines, Measurement of the Subtransient. Tracy, Tice. . . . 70-6; disc. 429
Impedances of Synchronous Machines, Per-Unit. Rankin.
Part I. . . . . 569-73
Part II. . . . . 839-41
Impedances Seen by Relays During Power Swings With and Without Faults. Clarke. . . . 372-84; disc. 471
Impregnated-Paper Insulation, Oil Stresses in. Whitehead. . . . . 555-7; disc. 955
Impregnated-Paper Insulation, The Dielectric Strength and Life of. Part IV. Whitehead, Kopper. . . . . 171-7; disc. 477, 942
Improved Fault Protection for Rural Distribution Systems. Van Ryan. . . . . 261-3
Improvement of Induction Motors, Application of Capacitors for Power-Factor. Bloomquist, Boice. . . . . 274-8
Improving Stability by Rapid Closing of Bus-Tie Switches. Kimbark. . . . . 61-4; disc. 416
Impulse-Failure-Detection Methods as Applied to Distribution Transformers. Stewart, Holcomb. . . . . 640-44; disc. 956
Inductance of a Toroidal Coil Without Iron, The Self-. Dwight. . . . . 805-06; disc. 999
Induction-Heating Circuits, Capacitors for High-Frequency. Clark, Scoville. . . . . 791-6; disc. 995
Induction-Heating Coils for Cylindrical Nonmagnetic Loads, Design of. Vaughan, Williamson. . . . . 587-92; disc. 965
Induction Heating of Moving Magnetic Strip. Baker. . . . . 184-9
Induction Motor, Symmetrical Components as Applied to the Single-Phase. Sabor. . . . . 651-6; disc. 958
Induction-Motor Windings and Cores, Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of. Trickey. . . . 842-4; disc. 998
Induction Motors, Application of Capacitors for Power-Factor Improvement of. Bloomquist, Boice. . 274-8
Induction Motors, Measurement of Stray-Load Loss in. Ware. . . . . 194-7; disc. 435
Induction Motors, Rating of High-Temperature. Alger, Jones. . . . . 300-02; disc. 458

Inductive and Generative Loads, Voltage and Current Relations for Controlled Rectification With. Puchlowski.....255–60; disc. 442
Industrial Control: Heating of Shunt-Motor Starting Resistors. Leland, Rader.....695–9; disc. 961
Industrial Dielectric Heating, The Role of Frequency in. Scott.....558–62
Industrial Distribution Systems: an Epitomization of Available Data, The Design of Bus-Bar. Higgins.....385–400; disc. 486
Inherent Errors in the Determination of Synchronous-Machine Reactances by Test. Concordia, Maginnis.....288–94; disc. 491
Instability in D-C Aircraft Systems. Bunce, Cunningham, Davidson.....786–71
Instrument for Measuring Insulation Resistance at High Voltage, A Portable. Atkinson, Taylor.....164–7; disc. 428
Instruments—Cyroscope Testing, A Tachometer—Accelerometer—Vibrometer for. Laurenson, Long.....593–6; disc. 960
Instrument Rotors, Basic Concepts of Moving-Magnet. Mendelsohn.....529–34; disc. 947
(Instruments) A Modulated-Frequency System of Telemetering. Renfro, Peterson.....45–7
(Instruments) A Study of Wave Shapes for Radio-Noise-Meter Calibrations. Frick.....890–901; disc. 969
(Instruments) An Interval Timer for Arc Duration. Quill.....237–40
(Instruments) Analysis and Design of a D-C Selsyn System. Manildi.....512–16; disc. 946
(Instruments) Biased-Core-Current-Transformer Design Method. Specht.....635–40
(Instruments) Heat-Flow Effects in a Resistance-Type Thermometer. Millar.....678–85
(Instruments) Orthomagnetic Bushing Current Transformer for Metering. Boyajian, Camilli.....137–40; disc. 427
(Instruments) Precision Testing of Electric Tachometers. Princi.....504–08; disc. 946
(Instruments) Response Time and Lag of a Thermometer Element Mounted in a Protecting Case. Goodwin.....665–70; disc. 959
Insulating Electric Machines, Organo-Silicon Compounds for. Kauppi, Moses.....90–3; disc. 457
Insulating Materials Used in Tropical Service, Electrolytic Corrosion—Methods of Evaluating. Thompson, Mather.....295–9; disc. 443
Insulating Varnishes, Control of Electrical-. Gibson, Braithwaite.....520–4
Insulation and Structural Rubber, Vibration. Connon.....324–9
Insulation Characteristics of Oil-Insulated Transformers, Standard. Vogt.....771; disc. 431
Insulation Failure, Chemical Contamination as Causes of Electrical-. Braithwaite, Moses.580–3; disc. 945
Insulation for Electric Machinery, The Application of Silicone Resins to. DeKlerk, Hill, Moses.....94–8; disc. 460
Insulation, Oil Stresses in Impregnated-Paper. Whitehead.....555–7; disc. 955
Insulation Resistance and Dielectric-Absorption Characteristics of Large A-C Stator Windings. Askey, Johnson.....347–51; disc. 458
Insulation Resistance at High Voltage, A Portable Instrument for Measuring. Atkinson, Taylor.....164–7; disc. 428
Insulation, The Dielectric Strength and Life of Impregnated-Paper. Part IV. Whitehead, Kopper.....171–7; disc. 477, 942
Insulator Development and Manufacture, Statistical Methods Applied to. Taylor.....495–9; disc. 952
Integral-Horsepower Motors, Investigation of Hot-Spot Temperatures in. Hildebrand, Cain, Phillips, Hough, Roswog, Potter.....124–8; disc. 421
Interconnected Systems, Control of Load, Frequency, and Time of. Duff.....778–86; disc. 999
Interrupting Capacity—5,000,000 Kva, The Next Step in. Hill, Leeds.....317–23; disc. 463
Interval and Dwell Tester for Bomb-Release Interval Control. Long.....648–51
Interval Timer for Arc Duration, An. Quill.....237–40
Inverters for Military Aircraft, 400-Cycle. Hayes, Ray.....233–7
Investigation of Hot-Spot Temperatures in Fractional-Horsepower Motors. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter.....128–36; disc. 421
Investigation of Hot-Spot Temperatures in Integral-Horsepower Motors. Hildebrand, Cain, Phillips, Hough, Roswog, Potter.....124–8; disc. 421
Investigation on 132-Kv System of American Gas and Electric Company, Lightning. Gross, Lippert.....76–84; disc. 474
Investigation on Transmission Lines, Lightning. Part VIII. Lewis, Foust.....107–15; disc. 472
Iron, The Self-Inductance of a Toroidal Coil Without. Dwight.....805–06; disc. 999

## J

Judging Mica Quality Electrically. Coutlee.....735–41

## L

Lag of a Thermometer Element Mounted in a Protecting Case, Response Time and. Goodwin.....665–70; disc. 959
(Land Transportation) Dynamic Braking With Traction Motors. Riley, Woods.....517–19
(Land Transportation) Measurement of Railway-Motor Temperatures in Service. Teker.....545–50
(Land Transportation) Rewinding Commutator-Type Traction Armatures. Greene, Stafford, Gentilini.....563–9; disc. 943
Lead-Cable-Sheath Corrosion, Study of A-C Sheath Currents and Their Effect on. Sherer, Granbois.....264–8; disc. 483
Life Quality, Statistical Methods in the Development of Apparatus. Ferreli.....700–03; disc. 998
Lightning-Arrester Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of. Goffman.....607–10; disc. 966
Lightning Arresters for Distribution Apparatus. Beck, Forbes.....719–24; disc. 970
Lightning Flashes to Transmission Lines, The Frequency of Occurrence and the Distribution of. Golde.....902–10; disc. 982
Lightning Investigation on 132-Kv System of American Gas and Electric Company. Gross, Lippert.....76–84; disc. 474
Lightning Investigation on Transmission Lines—Part VIII. Lewis, Foust.....107–15; disc. 472
Lightning Investigations on 33-Kv Wood-Pole Lines. Andrews, Mellann.....768–77; disc. 954
Limiting Fuse for Aircraft Applications, A Current-. Powell.....541–5
Line Diagrams, New Transmission-. Schwager, Wang.....610–15; disc. 955
Line Drop Produced by Resistance Welders. Longini.....619–23; disc. 943
Line, The Tapered Transmission. Milnor.....345–6
Lines, Cost Studies of 69- to 230-Kv Underground Power-Transmission Systems and Tie. Holm.....852–60
Lines, Lightning Investigation on Transmission. Part VIII. Lewis, Foust.....107–15; disc. 472
Lines, Nine Years' Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission. Sporn, Mather.....225–8; disc. 445
Lines, The Frequency of Occurrence and the Distribution of Lightning Flashes to Transmission. Golde.....902–10; disc. 982
Load Characteristics, Coincidence-Factor Relationships of Electric-Service-. Bary.....623–9
Load Control for Turbine Generators, Automatic. Crever, Jackson.....656–60
Load, Frequency, and Time of Interconnected Systems, Control of. Duff.....778–86; disc. 999
Load Loss in Induction Motors, Measurement of Stray-. Ware.....194–7; disc. 433
Load Outgrows the Distribution Power Supply, When the Welding. Clark, Stearns.....645–8; disc. 944
Load Swings, Automatic Regulation of Turbine Generators to Relieve Power-Supply Systems of Steel-Mill. Eberhardt, Harrison, Kohn, Darling.751–8
Loads, Design of Induction-Heating Coils for Cylindrical Nonmagnetic. Vaughan, Williamson.....587–92; disc. 965
Loads, Voltage and Current Relations for Controlled Rectification With Inductive and Generative. Puchlowski.....255–60; disc. 442
Location by Surge-Comparison Testing, Winding-Fault Detection and. Moses, Harter.....499–503; disc. 945
Loss in Induction Motors, Measurement of Stray-Load. Ware.....194–7; disc. 433
Losses in Radio-Frequency-Cable Components. Ragan.....927
Losses in Terms of Generating-Station-Capacity Investment, Evaluation of Electric Distribution. Mortara.....1–7; disc. 411

## M

Machine, Application of Electric Equipment for Ship-Propeller Milling. Morton, Rutemiller.....205–08; disc. 453
Machine Reactances by Test, Inherent Errors in the Determination of Synchronous-. Concordia, Maginnis.....288–94; disc. 491
Machine, The Direct- and Quadrature-Axis Equivalent Circuits of the Synchronous. Rankin.....861–9
Machine, Tracer-Controlled Position Regulator for Propeller Milling. Hanna, Osbon, Hartley.....201–05; disc. 452
Machines, Organo-Silicon Compounds for Insulating Electric. Kauppi, Moses.....90–3; disc. 457
Machines, Per-Unit Impedances of Synchronous. Rankin.
Part I.....849–73
Part II.....839–43
Magne-Blast Breaker, New Solenoid Mechanism for. Wyman, Keagy.....268–74; disc. 448
Magnet-Instrument Rotors, Basic Concepts of Moving-. Mendelsohn.....529–34; disc. 947
Magnetic Materials in Cores of Coils Subject to Superposed Direct Current, Optimum Air Gap for Various. Legg.....709–12; disc. 969
Magnetic Strip, Induction Heating of Moving. Baker.....184–9
Maintenance of Good Brush Performance. Kalb.....813–25; disc. 996
Manufacture of Lightning-Arrester Blocks, Statistics as an Aid to Engineering Judgment in the. Goffman.....607–10; disc. 966
Manufacture, Statistical Methods Applied to Insulator Development and. Taylor.....495–9; disc. 952
Manufacturing Methods, Radio-Frequency Cable. Odarenko.....922–5
Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C. Litman.....51–7
Materials Used in Tropical Service, Electrolytic Corrosion—Methods of Evaluating Insulating. Thompson, Mather.....295–9; disc. 443
Measurement of Railway-Motor Temperatures in Service. Teker.....545–50
Measurement of Stray-Load Loss in Induction Motors. Ware.....194–7; disc. 433
Measurement of the Subtransient Impedances of Synchronous Machines. Tracy, Tice.70–6; disc. 429
Measurements on Electromagnetic Devices, Dynamic. Norton.....151–4
Measurements on Polyethylene and Rubber Cables, Corona-Initiation. Depackh.....939–40
Measuring Attenuation of Coaxial Radio-Frequency Cable, The S-Function Method of. Stewart.....616–19; disc. 966
Measuring Insulation Resistance at High Voltage, A Portable Instrument for. Atkinson, Taylor.....164–7; disc. 428
Mechanism for Magne-Blast Breaker, New Solenoid. Wyman, Keagy.....268–74; disc. 448
Megavolt-Ampere Air-Blast Circuit Breaker for 138,000-Volt Service, A Three-Cycle 3,500-. Byrd, Beall.....229–32; disc. 463
Mercury-Arc Rectifiers for Railroads. Watkins.....84–6; disc. 419
Metallic Halides, Treatment of High-Altitude Brushes by Application of. Eby.....576–9
Meter Calibrations, A Study of Wave Shapes for Radio-Noise- Frick.....890–901; disc. 969
Metering, Orthomagnetic Bushing Current Transformer for. Boyajian, Camilli.....137–40; disc. 427
Method, Biased-Core-Current Transformer Design. Specht.....635–40
Method of Calculating Fault Currents on Rural Distribution Systems, Graphical. Linder.....16–19; disc. 446
Method of Measuring Attenuation of Coaxial Radio-Frequency Cable, The S-Function. Stewart.....616–19; disc. 966
Methods Applied to Insulator Development and Manufacture, Statistical. Taylor.....495–9; disc. 952
Methods as Applied to Distribution Transformers, Impulse-Failure-Detection. Stewart, Holtzedah.....640–44; disc. 955
Methods in the Development of Apparatus Life Quality, Statistical. Ferreli.....700–03; disc. 998
Methods of Evaluating Insulating Materials Used in Tropical Service, Electrolytic Corrosion—. Thompson, Mathes.....295–9; disc. 443
Mica Quality Electrically, Judging. Coutlee.....735–41
Military Aircraft, 400-Cycle Inverters for. Hayes, Ray.....233–7
Milling Machine, Application of Electric Equipment for Ship-Propeller. Morton, Rutemiller.....205–08; disc. 453
Milling Machine, Tracer-Controlled Position Regulator for Propeller. Hanna, Osbon, Hartley.....201–05; disc. 452
Modern Electric-Power Distribution Idea As Applied in a Large War Plant. Kaufmann, Kleh.....176–81; disc. 448
Modern Practice in Power-Plant Auxiliary Equipment and Systems. Muller.....868–72; disc. 976
Modulated-Frequency System of Telemetering, A. Renfro, Peterson.....45–7
Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-. Check.....215–20; disc. 450
Montreal, Canada, Electrification and Signaling of the Canadian National Railways Terminal. Cage.....41–4; disc. 417
Motor, A 400-Cycle Aircraft. Schwandt.....508–12; disc. 948
Motor, A Generalized Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase. Tarboux.....881–9; disc. 943
Motor, Symmetrical Components as Applied to the Single-Phase Induction. Sarr.....681–90; disc. 958
Motor, Synchronous Starting of Generator and. Concordia, Crary, Kilbourne, Waygood.....629–34; disc. 964
Motor Temperatures in Service, Measurement of Railway-. Teker.....545–50

Motors, Application of Capacitors for Power-Factor Improvement of Induction. Bloomquist, Boice . . . 274–8
Motors, Dynamic Braking With Traction. Riley, Woods . . . 817–19
Motors for Constant and Adjustable Speed, Central-Station Auxiliary-Drive. Gibson . 746–50; disc. 976
Motors, Investigation of Hot-Spot Temperatures in Fractional-Horsepower. Hirach, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter . . . 128–35; disc. 421
Motors, Investigation of Hot-Spot Temperatures in Integral-Horsepower. Hildebrand, Cain, Phillips, Hough, Roswog, Potter . . . 124–8; disc. 421
Motors, Measurement of Stray-Load Loss in Induction. Ware . . . 194–7; disc. 433
Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C Marine Propulsion. Litman . . . 31–7
Motors, Rating of High-Temperature Induction. Alger, Jones . . . 300–02; disc. 458
Moving-Magnet-Instrument Rotors, Basic Concepts of. Mendelsohn . . . 529–34; disc. 947
Moving Magnetic Strip, Induction Heating of. Baker . . . 184–9
Multilayer Coils, Eddy-Current Resistance of. Long . . . 712–18

## N

Naval Research Laboratory, Methods of Electrical and Mechanical Testing of Radio-Frequency Cables at the. Miller . . . 934–5
Network and Its Application to the Capacitor-Single-Phase Motor, A Generalized Circle Diagram for a Four-Terminal. Tarboux . . . 881–9; disc. 943
Network, Two-Phase Co-ordinates of a Four-Phase. Kimbark . . . 7–9
New Solenoid Mechanism for Magne-Blast Breaker. Wyman, Keagy . . . 268–74; disc. 448
New Transmission-Line Diagrams. Schwager, Wang . . . 610–15; disc. 955
Next Step in Interrupting Capacity—5,000,000 Kva, The. Hill, Leeds . . . 317–23; disc. 463
Nine Years' Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines, Sporn, Muller . . . 225–8; disc. 445
Noise-Meter Calibration, A Study of Wave Shapes for Radio-. Frick . . . 890–901; disc. 969
Nonmagnetic Loads, Design of Induction-Heating Coils for Cylindrical. Vaughan, Williamson . . . 587–92; disc. 965

## O

Occurrence and the Distribution of Lightning Flashes to Transmission Lines, The Frequency of. Golde . . . 902–10; disc. 982
Officers and Committees for 1945–46 . . . 1017–21
Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—, Sporn, St. Clair . . . 401–10; disc. 463
Oil Circuit Breaker, A High-Capacity High-Voltage Three-Cycle. Byrd, Rietz . . . 160–3; disc. 463
Oil-Insulated Transformers, Standards and Insulation Characteristics of. Vogel . . . 167–71; disc. 431
Oil Stresses in Impregnated-Paper Insulation. Whitehead . . . 555–7; disc. 955
132-Kv System of American Gas and Electric Company, Lighting Investigation on. Gross, Lippert . . . 76–84; disc. 474
Operation of Main-Engine-Driven 400-Cycle Aircraft Generators, Parallel. Levoy . . . 811–16; disc. 987
Operation of Transformers, Regulators, and Reactors, Guides for. (Committee Report) . . . 797–806; disc. 957
Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current. Legg . . . 709–12; disc. 969
Organo-Silicon Compounds for Insulating Electric Machines. Kauppi, Moses . . . 90–3; disc. 457
Orthomagnetic Bushing Current Transformer for Metering. Boyajian, Camilli . . . 137–40; disc. 427
Outdoor Air Switch and the Principles Involved in Its Design, A New. Graybill, Ferguson . . . 583–6; disc. 953
Outgrows the Distribution Power Supply, When the Welding Load. Clark, Stearns . . . 645–8; disc. 964

## P

Paper-Base Plastics, The Electrical Resistivity of Resin Treated Wood and Laminated Hydrolysed-Wood and. Weatherwax, Stamm . . . 833–8
Paper Insulation, Oil Stresses in Impregnated. Whitehead . . . 555–7; disc. 955
Paper Insulation, The Dielectric Strength and Life of Impregnated-. Part IV. Whitehead, Kopper . . . 171–7; disc. 477, 942
Parallel Operation of Main-Engine-Driven 400-Cycle Aircraft Generators. Levoy . . . 811–16; disc. 987
Per-Unit Impedances of Synchronous Machines. Rankin . . . 569–73
Part II . . . 839–41
Performance Criteria, Anode-Circuit-Breaker Design and. Boehne, Atwood . . . 337–45; disc. 437
Performance, Maintenance of Good Brush. Kalb . . . 819–25; disc. 996
Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and. Sporn, St. Clair . . . 401–10; disc. 463
Phase-Comparison Carrier-Current Relaying. McConnell, Cramer, Seeley . . . 825–33; disc. 973
Plant, Electric Power in a Steel. Graham . . . 816–18; disc. 994
Plant, Modern Electric-Power-Distribution Ideas as Applied in a Large. Kaufmann, Kieb . . . 279–87; disc. 488
Plastics, The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolysed-Wood and Paper-Base. Weatherwax, Stamm . . . 833–8
Pole 400-Cycle Electrically Operated Aircraft Circuit Breaker, A 208Y/120-Volt 120-Ampere Three-. Titus, Reifschneider . . . 551–5
Pole Lines, Lightning Investigations on 33-Kv Wood-. Andrews, McCann . . . 768–77; disc. 954
Polyethylene and Rubber Cables, Corona-Initiation Measurements on. Depackh . . . 939–40
Polyethylene as Cable Insulation. Malbauer, Myers . . . 916–18
Polyethylene, Dielectric Strength of. Del Mar . . . 918–19
Polyethylene, General Characteristics of. Shackleton . . . 912–16
Polyethylenes, Properties of Different. Clarke . 919–21
Portable Instrument for Measuring Insulation Resistance at High Voltage, A. Atkinson, Taylor . . . 164–7; disc. 428
Position Regulator for Propeller Milling Machine, Tracer-Controlled. Hanna, Osbon, Hartley . . . 201–05; disc. 452
(Power Applications, Industrial) Application of Electric Equipment for Ship-Propeller Milling Machine. Morton, Rutemiller . . . 205–08; disc. 453
(Power Applications, Industrial) Design of Induction-Heating Coils for Cylindrical Nonmagnetic Loads. Vaughan, Williamson . . . 587–92; disc. 965
(Power Applications, Industrial) Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack . . . 103–07
(Power Applications, Industrial). Electric Power in a Steel Plant. Graham . . . 816–18; disc. 994
(Power Applications, Industrial) Induction Heating of a Moving Magnetic Strip. Baker . . . 184–9
(Power Applications, Industrial) Maintenance of Good Brush Performance. Kalb . . . 819–25; disc. 996
(Power Applications, Industrial) The Design of Bus-Bar Industrial Distribution Systems: an Epitomization of Available Data. Higgins . . . 385–400; disc. 486
(Power Applications, Industrial) Tracer-Controlled Position Regulator for Propeller Milling Machine. Hanna, Osbon, Hartley . . . 201–05; disc. 452
Power-Distribution Ideas as Applied in a Large War Plant, Modern Electric-. Kaufmann, Kieb . . . 279–87; disc. 488
Power-Distribution Problem in Arc Welding, The. Pierce, Smith . . . 178–84; disc. 435
Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-. Bailey . . . 121–3; disc. 484
Power-Factor Improvement of Induction Motors, Application of Capacitors for. Bloomquist, Boice . . . 274–8
(Power Generation) Automatic Load Control for Turbine Generators. Crever, Jackson . . . 656–60
(Power Generation) Auxiliary-Power Supply for Generating Stations. McCallum . . . 693–5; disc. 976
(Power Generation) Central-Station Auxiliary-Drive Motors for Constant and Adjustable Speed. Gibson . . . 746–50; disc. 976
(Power Generation) Control of Load, Frequency, and Time of Interconnected Systems. Duff . . . 778–86; disc. 999
(Power Generation) Electric Drives for Steam-Electric Generating-Station Auxiliaries. Brownlee, Etel . . . 741–5; disc. 976
(Power Generation) Evaluation of Electric Distribution Losses in Terms of Generating-Station-Capacity Investment. Mortensen . . . 402–9; disc. 411
(Power Generation) Frequency Changers—Characteristics, Applications, and Economics. Crary, Easley . . . 351–8; disc. 416
(Power Generation) Use of Dielectric-Absorption Test in Drying Out Large Generators. Marcroft . . . 56–60; disc. 415
Power Geometry of General Transmission Systems, Alternating-. Starr . . . 313–17; disc. 493
Power in a Steel Plant, Electric. Graham . . . 816–18; disc. 994
Power-Line Carrier Channels. Brown . . . 246–51
Power-Line Carrier Channels, The Combination of Supervisory Control With Other Functions on. Cheek, Dorr . . . 241–6
Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for. Cheek . . . 215–20; disc. 450
Power-Plant Auxiliary Equipment and Systems, Modern Practice in. Muller . . . 868–72; disc. 976
Power Ratings and Stability, Radio-Frequency-Cable. Bickerton . . . 928–9
Power Rectifiers for A-C Aircraft Systems, Selenium. Embry . . . 596–600
